## PREFACE

---

This Report is issued under an arrangement for statistical co-operation between the Dominion Bureau of Statistics and the Government departments having jurisdiction with regard to fisheries throughout Canada. These departments comprise: the Dominion Fisheries Department which exercises jurisdiction over the fisheries of the Maritime provinces, Yukon Territory and British Columbia and the Fisheries Branches of departments of Ontario, Quebec,\* Manitoba, Saskatchewan and Alberta which have jurisdiction over the fisheries of their respective provinces. The province of British Columbia has a Fisheries Branch, but it does not engage in independent statistical work.

Under the arrangement above referred to, the statistics of the catch, and of the products marketed in a fresh state or domestically prepared, are collected by the local fisheries officers, checked in the Department of Fisheries, and co-ordinated and compiled in the Dominion Bureau of Statistics. In the case of manufactured fish products, schedules in conformity with those of other sections of the Census of Industry are sent by the Bureau to the operators of canneries, fish-curing establishments, etc., the fisheries officers assisting in securing an expeditious and accurate return. The grateful acknowledgments of the Bureau are tendered to the officers of the provincial governments who co-operate in these arrangements.

For reasons of economy, the volumes since 1938 omit certain reading matter and tables which were contained in the Introduction of earlier reports, among which may be mentioned the short history of the fisheries of Canada and the annual review of fishing conditions during the year. Statistics of external trade in fisheries products are limited to three summary tables, as detailed tables showing commodities by countries of import and export are presented in the publications of the External Trade Branch of the Dominion Bureau of Statistics. The table of fish oil production, first presented in the 1942 Report, has been extended to cover a five-year period and a new table has been added, showing the production of fish meal in the five latest years.

This report was prepared under the direction of Mr. W. H. Lanceley, Chief of the Fisheries and Animal Products Branch of the Bureau.

S. A. CUDMORE,  
*Dominion Statistician.*

DOMINION BUREAU OF STATISTICS,  
OTTAWA, April 1, 1945.

---

\* The fisheries of the Magdalen Islands were transferred to the jurisdiction of the Province of Quebec as from April 1, 1943.

## FISHERIES STATISTICS OF CANADA, 1943

The total value of production of the fisheries of Canada for the year 1943 was \$85,594,544, compared with \$75,116,933 in 1942 and \$62,258,997 in 1941. These totals represent the value of the product as marketed, whether sold for consumption fresh, domestically prepared or factory made. Table 1 shows the quantity caught and the value marketed of the chief commercial fishes (those valued at \$200,000 or upwards) for the past five years, with a statement in the final column of the increase or decrease for 1943 compared with 1942, while Table 2 gives the quantity and value of all fish as caught and marketed, for the years 1942 and 1943.

## 1. Quantity Caught and Value Marketed of the Chief Commercial Fishes, Canada, 1939 to 1943

NOTE.—The catch as shown in this table is in each case exclusive of the quantity of livers landed, but the value includes the value of the livers as marketed.

## CAPITAL EQUIPMENT AND EMPLOYEES

## IN PRIMARY OPERATIONS

*Capital.*—The capital investment, represented by the vessels, boats, nets, traps, piers and wharves, etc., used in the primary operations of catching and landing the fish, had a total value in 1943 of \$31,120,516, of which \$25,104,273 or 81 per cent, is credited to the sea fisheries, and \$6,016,243, or 19 per cent to the inland fisheries. The total amount shows an increase of \$2,042,602 when compared with the year 1942.

*Employees.*—The number of men engaged in fishing during the year was 61,459, comprising 45,900 employed in the sea fisheries and 15,559 in the inland fisheries. There was an increase of 92 persons from the previous year, sea fisheries showing a drop of 1,654 and inland fisheries an increase of 1,746.

## IN FISH PROCESSING

*Capital.*—The capital investment of the fish processing plants in operation decreased from \$33,554,131 in 1942 to \$30,741,194 in 1943. The salmon canneries claim the largest amount with \$12,124,270 or 39 per cent of the whole. The relation which the capital of each classification bears to the total investment is shown by the following table of percentages: salmon canneries, 39 per cent, fish curing establishments, 18 per cent, sardine and other fish canneries, 15 per cent, fresh fish and freezing plants, 14 per cent, reduction plants, 9 per cent and lobster canneries, 4 per cent. The value of the clam canneries represents less than 1 per cent of the total.

*Employees.*—The employees engaged in the fish processing plants in 1943 numbered 15,899, including 8,965 male and 6,934 female employees. This shows an increase of 168 when compared with 8,593 male and 7,138 female or 15,731 employees in 1942.

Tables 3 to 6, which follow, contain summaries of capital equipment and employees in the primary operations and in fish processing establishments for Canada. Tables 12 and 13 give the same information by provinces.

Statistics by counties and fishing districts will be found in Tables 31 to 43.

## REVIEW OF THE FISHERIES BY PROVINCES

Tables 7 to 13 show by provinces: the total value of the fisheries; the quantity caught and landed and the value marketed of the chief commercial fishes; the quantity and value of all fish caught and landed and marketed; the total values for counties or districts of sea fish caught and landed and marketed; the quantity of sea fish taken offshore; the capital equipment and the number of employees.

## 7. Value of the Fisheries by Provinces, 1939-43, in Order of Value, 1943

## FISHERIES BOUNTY

Under the authority of "An Act to Encourage the Development of the Sea Fisheries and the Building of Fishing Vessels" the sum of \$160,000 is appropriated annually by the Governor in Council. It is distributed under the name of Fishing Bounty by the Department of Fisheries amongst fishermen and fishing vessel and boat owners on the Atlantic coast, under regulations made from time to time by the Governor in Council.

For the year 1943, payment was made on the following basis:—

To owners of vessels entitled to receive bounty—\$1 per registered ton;  
payment to the owner of any one vessel not to exceed \$80.

To vessel fishermen entitled to receive bounty—\$7.90 each.

To owners of boats measuring not less than 12 feet keel—\$1 per boat.

To boat fishermen entitled to receive bounty—\$7.40 each.

The total amount paid in 1943 was \$159,400.80 allocated as follows:—

To 736 vessels and their crews . . . . . \$ 38,034.60

To 8,929 boats and their crews . . . . . \$121,366.20

---

## HISTORICAL REVIEW

The five pages which follow afford a review of the fishing industry of Canada. In the case of production, returns are given, by provinces, back to 1870. In the case of the number and value of vessels, boats, etc., the review extends to 1880, and in the case of the number of employees to 1895.

## 14. Total Value of the Fisheries, by Provinces, 1870, 1875, and 1880 to 1943

## FOREIGN TRADE

*Exports.*—The total value of domestic exports of fish and fishery products was \$60,313,127 in 1943, an increase of 16·2 per cent over the \$51,907,291 recorded for 1942.

Canned salmon led in value (\$12,110,563) followed by canned sea herring (\$6,255,666) and freshwater fish, other than whitefish, fresh and frozen (\$6,138,729); these three leading items accounted for 20·1 per cent, 10·4 per cent and 10·2 per cent, respectively, of the total value of exports, the salmon being consigned almost entirely to the United Kingdom, with the major part of the herring pack going to the United Kingdom, Australia, Egypt and British India, while the freshwater fish went entirely to the United States. Other items, in order of value were: fresh lobsters, \$4,331,095; fresh and frozen whitefish, \$3,403,926; filleted cod and other groundfish, fresh and frozen, \$3,386,530; dried cod, \$2,329,533; canned lobsters, \$2,242,661; fresh halibut, \$1,584,785. The total value of fish and sea-mammal oils exported was \$3,160,197. The United States received 60·6 per cent of the total value of exports and the United Kingdom took 29·3 per cent.

Detailed statistics of exports, by products, are given in Table 52 of this volume.

*Imports.*—Imports totalled \$4,261,768 in 1943, as compared with \$3,463,695 in 1942. Whale oil accounted for \$1,048,631, or 24·6 per cent of the total, the supply coming from the Falkland Islands, Newfoundland and the United States. Fresh groundfish from Newfoundland was valued at \$631,233 and salmon from the same country at \$336,164; fresh salmon from Alaska and the United States brought the import value of this commodity up to \$339,363.

Detailed statistics of imports, by commodities, are given in Table 53.

Table 19 gives values of exports and imports for the years 1927 to 1943.

**19. Values of Exports and Imports of Fish and Fishery Products in the years ending December 31, 1927 to 1943**

Year	Exports	Imports	Year	Exports	Imports
	\$	\$		\$	\$

## 20. Table for Conversion of Weights of Fish

Fresh fish in this table in the case of cod, haddock, hake, cusk and pollock means fish with the head on and the entrails removed. The weight of halibut is to be the weight minus head and entrails. In the case of swordfish and tuna, it means fish with the head, tail and entrails removed. In all other cases, fresh fish means fish as it comes from the water.

## COD, HADDOCK, HAKE, CUSK OR POLLOCK

- 300 lb. of fresh produce one cwt. of fresh fillets.
- 105 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one cwt. of green salted.
- 300 lb. of fresh produce one cwt. of smoked fillets.
- 200 lb. of fresh produce one cwt. of smoked.
- 300 lb. of fresh produce one cwt. (100 lb.) of dried.
- 400 lb. of fresh produce one cwt. of boneless.

## HERRING

- 70 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one cwt. of smoked.
- 300 lb. of fresh produce one barrel of pickled.
- 200 lb. of fresh produce one barrel of bait (fresh or salted).
- 200 lb. of fresh produce one barrel of fertilizer.
- 115 lb. of fresh produce one cwt. of dry salted.

## MACKEREL OR SHAD

- 70 lb. of fresh produce one case of canned.
- 300 lb. of fresh produce one barrel of pickled.
- 400 lb. of fresh produce one barrel of salt mackerel fillets.

## SARDINES

- One barrel of fresh produces 4 to 5 cases canned.
- (One case of 25 lb. equals 100 tins of  $\frac{1}{4}$  lb. each.)

## PILCHARDS

- 70 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one barrel of bait.

## ALEWIVES

- 200 lb. of fresh produce one cwt. of smoked.
- 275 lb. of fresh produce one barrel of pickled.

## SALMON

- 80 lb. of fresh (Pacific) produce one 48-lb. case canned.
- 70 lb. of fresh (Atlantic) produce one 48-lb. case canned.
- 170 lb. of fresh produce one cwt. of smoked.
- 125 lb. of fresh produce one cwt. of dry salted.
- 150 lb. of fresh produce one cwt. of mild cured.
- 150 lb. of fresh produce one cwt. of pickled.

## TUNA

- 100 lb. of fresh produce one case canned.

## CLAMS

- Atlantic Coast*—200 lb. of fresh produce one case of canned (48 tins of 5 oz. of clam meat each).
- Pacific Coast*—
- Razor clams—80 lb. of fresh produce one case of canned (48 tins of 6 oz. of clam meat each).
- Little neck, butter clams, etc.—150 lb. of fresh produce one case of canned. (48 tins of 6 oz. of clam meat each).

## CRABS

- Pacific Coast*—100 lb. of fresh (approximately 6 dozen) produce one case of canned (48 tins of  $6\frac{1}{2}$  oz. each of drained crab meat).

## LOBSTERS

- 200 lb. of fresh produce one case of canned (48 tins of 12 oz. of lobster meat each).
- 500 lb. of fresh produce one cwt. of lobster meat.

55. Fishing Bounties Paid to Vessels and Boats for the Season 1943-44

NOTE:—A number of "late" claims amounting in all to \$1,682.40 and which are included in this statement, are for the season of 1942. As the basis of distribution for 1942 differed from that of 1943, a number of figures in the "amount" columns do not, as a result, balance with the number of claims paid.

Province and County	Number of Boats	Number of Men	Amount Paid	Number of Vessels	Tonnage	Average Tonnage	Number of Men	Amount Paid	Total Bounty Paid to Vessels and Boats

<sup>1</sup> During the year 1943 four trawlers were in operation, one for part time only. after 1940.<sup>2</sup> Classified as Canadian plaice

The following statement, prepared from Canadian fisheries statistics for the year shows the catches by Canadian fishermen in 1943 in certain areas, defined by the North American Council on Fishery Investigations, an international body representative of Canada, United States, Newfoundland and France for the co-ordination of fishery investigations in the Atlantic waters of the Continent. The boundaries of the areas are indicated in the accompanying chart.

# STATISTIQUE DES PÊCHERIES 1943

(En collaboration avec les ministères des Pêcheries du  
Gouvernement fédéral et des Provinces)

Publié par ordre de l'Hon. James A. MacKinnon, M.P.  
Ministre du Commerce

OTTAWA  
EDMOND CLOUTIER  
IMPRIMEUR DE SA TRÈS EXCELLENTE MAJESTÉ LE ROI  
1945

## PRÉFACE

Ce rapport est publié en vertu d'une entente établissant la collaboration en matière de statistique entre le Bureau Fédéral de la Statistique et les différents services gouvernementaux ayant juridiction sur les pêcheries canadiennes. Ces services comprennent le Ministère Fédéral des Pêcheries, qui exerce sa juridiction sur les pêcheries des Provinces Maritimes, du Yukon et de la Colombie Britannique, et les divisions des Pêcheries des provinces d'Ontario, Québec,\* Manitoba, Saskatchewan et Alberta, qui régissent les pêcheries de leurs provinces respectives. La Colombie Britannique possède une division des Pêcheries, mais cet organisme ne s'occupe pas de statistique pour son propre compte.

En vertu de l'arrangement dont il est parlé plus haut, les statistiques du poisson pêché et des produits offerts en vente à l'état frais ou après une préparation sommaire, sont recueillies par les fonctionnaires locaux du Ministère des Pêcheries, vérifiées au Ministère des Pêcheries, et condensées et compilées au Bureau Fédéral de la Statistique. En ce qui concerne le poisson industriellement préparé et ses sous-produits, des formules similaires à celles en usage dans le recensement des autres branches de la production sont envoyées directement par le Bureau aux usines poissonnières, les fonctionnaires des services des Pêcheries s'assurant que ces formules sont consciencieusement remplies et promptement retournées. Les fonctionnaires des gouvernements provinciaux voudront bien accepter nos remerciements pour le concours qu'ils nous ont prêté.

Pour des raisons d'économie, les rapports depuis 1938 omettent certains textes et tableaux qui étaient contenus dans l'Introduction des rapports antérieurs et parmi lesquels on peut mentionner l'historique des pêcheries au Canada et le Résumé annuel des conditions de la pêche durant l'année. Les statistiques du commerce extérieur dans les produits de la pêche se limitent à trois tableaux sommaires, car des tableaux détaillés montrant les produits par pays importateur et exportateur sont présentés dans les publications de la Branche du Commerce Extérieur du Bureau Fédéral de la Statistique. Le Tableau sur la production des huiles de poisson, présenté pour la première fois dans le Rapport de 1942, est développé de façon à couvrir une période de cinq ans; un nouveau tableau fait voir la production de la farine de poisson en ces cinq dernières années.

Le présent rapport a été préparé sous la direction de M. W. H. Lanceley, chef de la Branche des Pêcheries et des Produits Animaux du Bureau.

S. A. CUDMORE,  
*Statisticien du Dominion.*

BUREAU FÉDÉRAL DE LA STATISTIQUE,  
OTTAWA, le 1er avril 1945.

\* Les pêcheries des Îles-de-la-Madeleine ont été transférées à la juridiction de la province de Québec depuis le 1er avril 1943.

Vaisseaux faisant la pêche des principales espèces de poisson de mer, 1943—	
47. Ile du Prince-Edouard, 204; 48. Nouvelle-Ecosse, 204; 49. Nouveau-Brunswick, 212; 50. Québec, 214; 51. Colombie Britannique, 216.	
Divers—	
52. Exportations de poisson, par espèce de poisson, 1941-43.....	220
53. Importations de poisson, par espèce de poisson, 1941-43.....	221
54. Exportations de poisson, par pays, 1941-43.....	223
55. Primes versées aux pêcheries, saison de 1943-44.....	224
56. Mise en conserve du saumon en Colombie Britannique, par district et espèce, 1943.....	224
57. Mise en conserve du saumon en Colombie Britannique, par espèce, 1934-43.....	225
58. Mise en conserve du homard, par province, 1923-43.....	225
59. Production des huiles de poisson, 1939-43.....	226
60. Production de farine de poisson, 1939-43.....	227
61. Débarquements de chalutiers à vapeur sur la côte de l'Atlantique, 1940-43.....	227
62. Production poissonnière dans les zones définies par le Conseil d'enquête sur les pêcheries de l'Amérique du Nord, 1943.....	228

## STATISTIQUES DES PÊCHERIES DU CANADA, 1943

La valeur totale de la production des pêcheries du Canada en 1943 est de \$85,594,544 contre \$75,116,933 en 1942 et \$62,258,997 en 1941. Ces chiffres représentent la valeur des produits tels que vendus, livrés à la consommation immédiate, préparés par les pêcheurs ou apprêtés dans un établissement. Le tableau 1, montre les prises et la valeur marchande des principaux poissons commerciaux (valant \$200,000 et plus) ces cinq dernières années; la dernière colonne fait voir l'augmentation ou la diminution sur 1942 en 1943. Le tableau 2 donne la quantité et la valeur du poisson pêché et mis en vente, en 1942 et 1943.

## 1. Quantité et valeur marchande des principaux poissons commerciaux, 1939 à 1943

NOTA.—La prise donnée dans ce tableau, en chaque cas, ne comprend pas la quantité de foie débarquée, mais la valeur englobe celle du foie tel que mis sur le marché.

## OUTILLAGE-CAPITAL ET EMPLOYÉS

## DANS LES OPÉRATIONS PRIMAIRES

*Capital.*—Les immobilisations globales en fait de vaisseaux, barques, filets, pièges, quais et môles, etc., employés dans les opérations primaires de la prise et du débarquement du poisson en 1943, sont de \$31,120,516, dont \$25,104,273 ou 81 p.c. pour les pêcheries maritimes et \$6,016,243 ou 19 p.c. pour les pêcheries intérieures. Le montant global indique une augmentation de \$2,042,602 sur l'année 1942.

*Employés.*—Le nombre d'hommes employés à la pêche durant l'année s'élève à 61,459, dont 45,900 dans les pêcheries maritimes et 15,559 pour les pêcheries intérieures. Comparativement à l'an dernier, ce total représente une augmentation de 92; les pêcheries maritimes accusent une diminution de 1,654 et ceux de l'intérieur une augmentation de 1,746.

## DANS LES CONSERVERIES ET SAURISSERIES

*Capital.*—Les immobilisations globales de l'industrie du conditionnement du poisson ont diminuée de \$33,554,131 en 1942 à \$30,741,194 en 1943. Le plus fort montant va aux saumoneries, soit \$12,124,270 ou 39 p.c. du total. Le rapport entre les immobilisations de chaque groupe et le total est indiqué par les pourcentages suivants: saumoneries, 39 p.c.; saurisséries, 18 p.c.; sardinerias et autres conserveries, 15 p.c.; poisson frais et glaciers, 14 p.c.; huileries, 9 p.c.; homarderies, 4 p.c. Les immobilisations dans les conserveries de coques représentent moins de 1 p.c. du total.

*Employés.*—Les employés de ces établissements sont au nombre de 15,899 en 1943, dont 8,965 hommes et 6,934 femmes; soit 168 employés de plus sur 8,593 hommes et 7,138 femmes ou 15,731 employés en 1942.

Les tableaux 3 à 6 qui suivent montrent en résumé l'outillage-capital et les employés dans les opérations primaires et dans les conserveries et saurisséries pour l'ensemble du Canada; les tableaux 12 et 13 représentent les statistiques par province.

Les statistiques par comté et district se trouvent dans les tableaux 31 à 43 du rapport.

## PRIMES

En vertu d'une "Loi pour encourager le développement des pêcheries maritimes et la construction des navires de pêche", une somme de \$160,000 est donnée en primes chaque année par le Gouverneur en Conseil. Sous le nom de primes de pêche, elles sont distribuées par le Ministère des Pêcheries parmi les pêcheurs et les propriétaires de navires et barques de pêche du littoral de l'Atlantique selon les règlements édictés de temps à autre par le Gouverneur en Conseil.

En 1943 les versements sont effectués sur la base suivante:—

Aux propriétaires de navires de pêche ayant droit à cette prime, \$1 par tonne enregistrée; avec un maximum de \$80 par navire.

A chaque membre de l'équipage ayant droit à la prime, \$7.90.

Aux propriétaires de barques mesurant au moins 12 pieds de quille, \$1 par embarcation.

A chaque pêcheur d'une barque ayant droit à une prime, \$7.40.

Le montant payé en 1943 est de \$159,400.80, réparti comme suit:

A 736 propriétaires de navires et leurs équipages.....	\$ 38,034.60
A 8,929 propriétaires de barques et leurs équipages.....	\$121,366.20

---

## REVUE RÉTROSPECTIVE

Les cinq tableaux suivants présentent une revue rétrospective de l'industrie de la pêche au Canada, pendant les années passées. En ce qui concerne la production, les données sont établies par province et par année et remontent jusqu'à 1870. Quant au nombre et à la valeur des navires, barques, etc., les chiffres partent de l'année 1880; le personnel qu'emploie cette industrie est donné depuis 1895.

14. Valeur totale des pêcheries dans les différentes provinces du Canada pour les années 1870, 1875 et 1880 jusqu'à 1943 inclusivement

## COMMERCE EXTÉRIEUR

*Exportations.*—Les exportations domestiques de poisson et de produits des pêcheries ont une valeur globale de \$60,313,127 en 1943, augmentation de 16.2 p.c. comparativement à celle de \$51,907,291 en 1942.

Le saumon en boîte tient le premier rang pour la valeur (\$12,110,563), suivi du hareng de mer en boîte (\$6,255,666) et du poisson d'eau douce autre que le corégone, frais et congelé (\$6,138,729); ces trois principaux produits s'attribuent 20.1 p.c., 10.4 p.c. et 10.2 p.c. respectivement de la valeur totale des exportations. Le saumon est consigné presque entièrement au Royaume-Uni, tandis que la majeure partie du hareng en boîte va au Royaume-Uni, à l'Australie, à l'Egypte et à l'Inde Britannique. Le poisson d'eau douce va entièrement aux Etats-Unis. Les autres produits, par ordre de valeur, sont les suivants: homard frais, \$1,331,095; corégone frais et congelé, \$3,403,926; filets de morue et d'autres poissons du fond, frais et congelés, \$3,386,530; morue séchée, \$2,329,533; homard en conserve, \$2,242,661; flétan frais, \$1,584,785. Les exportations d'huiles de poisson et de mammifères marins ont une valeur totale de \$3,160,197. Les Etats-Unis reçoivent 60.6 p.c. de la valeur totale des exportations et le Royaume-Uni, 29.3 p.c.

Les statistiques détaillées des exportations, par produit, paraissent au tableau 52 de ce volume.

*Importations.*—Les importations s'établissent à \$4,261,768 en 1943 contre \$3,463,695 en 1942. Les importations d'huile de baleine s'élèvent à \$1,048,631, soit 24.6 p.c. du total, et proviennent des îles Falkland, de Terre-Neuve et des Etats-Unis. Le poisson de fond frais de Terre-Neuve est évalué à \$631,233 et le saumon du même pays à \$336,164; le saumon frais de l'Alaska et des Etats-Unis porte à \$339,363 la valeur des importations de cette denrée.

Les statistiques détaillées des importations, par denrée, sont données au tableau 53.

Le tableau 19 donne la valeur des exportations et des importations annuelles de 1927 à 1943.

19. Valeur des exportations et des importations de poisson et de produits poissonniers, années terminées le 31 décembre, 1927 à 1943

Année	Exportations	Importations	Année	Exportations	Importations
	\$	\$		\$	\$
1927.....	34,814,448	3,768,901	1936.....	25,398,102	2,918,251

## 20. Tableau de conversion de la pesée du poisson

Dans ce tableau, dans le cas de la morue, de l'églefin, de la merluche, du brosmius, et du merlan on entend par poisson frais le poisson dont on a enlevé les entrailles et non la tête. Le poids du flétan est pris après l'enlèvement de la tête et des entrailles. Dans le cas de l'espadon et du thon le poids comprend le poisson après l'enlèvement de la tête, de la queue et des entrailles. Pour tous les autres poissons le terme "poisson frais" signifie le poisson tel qu'il est sorti de l'eau.

## MORUE, EGLEFIN, MERLUCHE ET BROSMIUS OU MERLAN

- 300 lb de poisson frais donnent 1 cwt de filets frais.
- 105 lb de poisson frais donnent une caisse de poisson en boîte.
- 200 lb de poisson frais donnent 1 cwt de poisson salé vert.
- 300 lb de poisson frais donnent 1 cwt de filets fumés.
- 200 lb de poisson frais donnent 1 cwt de poisson fumé.
- 300 lb de poisson frais donnent 1 cwt de poisson séché.
- 400 lb de poisson frais donnent 1 cwt de poisson désossé.

## HARENG

- 70 lb de poisson frais donnent une caisse de hareng en boîte.
- 200 lb de poisson frais donnent 1 cwt de hareng fumé.
- 300 lb de poisson frais donnent un baril de hareng saumuré.
- 200 lb de poisson frais donnent un baril de boette (fraîche ou salée).
- 200 lb de poisson frais donnent un baril d'engrais.
- 115 lb de poisson frais donnent 1 cwt de hareng salé à sec.

## MAQUEREAU OU ALOSE

- 70 lb de poisson frais donnent une caisse de poisson en boîte.
- 300 lb de poisson frais donnent un baril de poisson saumuré.
- 400 lb de poisson frais donnent un baril de filets de maquereau salés.

## SARDINE

- Un baril de poisson frais donne de 4 à 5 caisses de poisson en boîte.
- Une caisse de 25 livres équivaut à 100 boîtes de  $\frac{1}{4}$  de lb chacune.

## PILCHARD

- 70 lb de poisson frais donnent une caisse de poisson en boîte.
- 200 lb de poisson frais donnent un baril de boette.

## GASPAROT

- 200 lb de poisson frais donnent 1 cwt de poisson fumé.
- 275 lb de poisson frais donnent un baril de poisson saumuré.

## SAUMON

- 80 lb de poisson frais (Pacifique) donnent une caisse de 48 lb de poisson en boîte.
- 70 lb de poisson frais (Atlantique) donnent une caisse de 48 lb de poisson en boîte.
- 170 lb de poisson frais donnent 1 cwt de poisson fumé.
- 125 lb de poisson frais donnent 1 cwt de poisson salé à sec.
- 150 lb de poisson frais donnent 1 cwt de poisson fumé doux.
- 150 lb de poisson frais donnent 1 cwt de poisson saumuré.

## THON

- 100 lb de poisson frais donnent une caisse de poisson en boîte.

## COQUES

*Littoral de l'Atlantique—*

- 200 lb de coques fraîches donnent une caisse de coques en boîtes (48 boîtes de 5 onces de chair chacune).

*Littoral du Pacifique—*

- Couteaux.—80 lb de chair fraîche donnent une caisse de chair en boîte (48 boîtes de 6 onces de chair chacune).

- Praires du Pacifique, amandes de mer, etc.—150 lb de chair fraîche donnent une caisse de chair en boîte. (48 boîtes de 6 onces de chair chacune).

## CRABES

*Littoral du Pacifique—*

- 100 lb de crabe frais (environ 6 douzaines) donnent une caisse de chair en boîte (48 boîtes de  $6\frac{1}{2}$  onces de chair égouttée chacune).

## HOMARD

- 200 lb de homard frais donnent une caisse de homard en boîte (48 boîtes de 12 onces de chair chacune).

- 500 lb de homard frais donnent 1 cwt de chair.

## PREFACE

This Report is issued under an arrangement for statistical co-operation between the Dominion Bureau of Statistics and the Government departments having jurisdiction with regard to fisheries throughout Canada. These departments comprise: the Dominion Fisheries Department which exercises jurisdiction over the fisheries of the Maritime provinces, Yukon Territory and British Columbia and the Fisheries Branches of departments of Ontario, Quebec, Manitoba, Saskatchewan and Alberta which have jurisdiction over the fisheries of their respective provinces. The province of British Columbia has a Fisheries Branch, but it does not engage in independent statistical work.

Under the arrangement above referred to, the statistics of the catch, and of the products marketed in a fresh state or domestically prepared, are collected by the local fisheries officers, checked in the Department of Fisheries, and co-ordinated and compiled in the Dominion Bureau of Statistics. In the case of manufactured fish products, schedules in conformity with those of other sections of the Census of Industry are sent by the Bureau to the operators of canneries, fish-curing establishments, etc., the fisheries officers assisting in securing an expeditious and accurate return. The grateful acknowledgments of the Bureau are tendered to the officers of the provincial governments who co-operate in these arrangements.

For reasons of economy, the volumes since 1938 omit certain reading matter and tables which were contained in the Introduction of earlier reports, among which may be mentioned the short history of the fisheries of Canada and the annual review of fishing conditions during the year. Statistics of external trade in fisheries products are limited to three summary tables, as detailed tables showing commodities by countries of import and export are presented in the publications of the External Trade Branch of the Dominion Bureau of Statistics.

Two new tables, showing the quantities of fish and shellfish landed since 1918, by main groups and by provinces, have been added to the Report and the table of conversion factors has been brought to the front of the volume.

This report was prepared under the direction of Mr. W. H. Lanceley, Chief of the Fisheries and Animal Products Branch of the Bureau.

HERBERT MARSHALL,  
*Dominion Statistician.*

DOMINION BUREAU OF STATISTICS,  
OTTAWA, April 1, 1946.

## TABLE FOR CONVERSION OF WEIGHTS OF FISH

Fresh fish in this table in the case of cod, haddock, hake, cusk and pollock, means fish with the head on and the entrails removed. The weight of halibut is to be the weight minus head and entrails. In the case of swordfish and tuna, it means fish with the head, tail and entrails removed. In all other cases, fresh fish means fish as it comes from the water.

### COD, HADDOCK, HAKE, CUSK OR POLLOCK

- 300 lb. of fresh produce one cwt. of fresh fillets.
- 105 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one cwt. of green salted.
- 300 lb. of fresh produce one cwt. of smoked fillets.
- 200 lb. of fresh produce one cwt. of smoked.
- 300 lb. of fresh produce one cwt. (100 lb.) of dried.
- 400 lb. of fresh produce one cwt. of boneless.

### HERRING

- 70 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one cwt. of smoked.
- 300 lb. of fresh produce one barrel of pickled.
- 200 lb. of fresh produce one barrel of bait (fresh or salted).
- 200 lb. of fresh produce one barrel of fertilizer.
- 115 lb. of fresh produce one cwt. of dry salted.

### MACKEREL OR SHAD

- 70 lb. of fresh produce one case of canned.
- 300 lb. of fresh produce one barrel of pickled.
- 400 lb. of fresh produce one barrel of salt mackerel fillets.

### SARDINES

- One barrel of fresh produces 4 to 5 cases canned.
- (One case of 25 lb. equals 100 tins of  $\frac{1}{4}$  lb. each.)

### PILCHARDS

- 70 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one barrel of bait.

### ALEWIVES

- 200 lb. of fresh produce one cwt. of smoked.
- 275 lb. of fresh produce one barrel of pickled.

### SALMON

- 80 lb. of fresh (Pacific) produce one 48-lb. case canned.
- 70 lb. of fresh (Atlantic) produce one 48-lb. case canned.
- 170 lb. of fresh produce one cwt. of smoked.
- 125 lb. of fresh produce one cwt. of dry salted.
- 150 lb. of fresh produce one cwt. of mild cured.
- 150 lb. of fresh produce one cwt. of pickled.

### TUNA

- 100 lb. of fresh produce one case canned.

### CLAMS

- Atlantic Coast*—200 lb. of fresh produce one case of canned (48 tins of 5 oz. of clam meat each).
- Pacific Coast*—
- Razor clams—80 lb. of fresh produce one case of canned (48 tins of 6 oz. of clam meat each).
- Little neck, butter clams, etc.—150 lb. of fresh produce one case of canned. (48 tins of 6 oz. of clam meat each).

### CRABS

- Pacific Coast*—100 lb. of fresh (approximately 6 dozen) produce one case of canned (48 tins of  $6\frac{1}{2}$  oz. each of drained crab meat).

### LOBSTERS

- 200 lb. of fresh produce one case of canned (48 tins of 12 oz. of lobster meat each).
- 500 lb. of fresh produce one cwt. of lobster meat.

63. Fisheries Production in Areas Defined by North American Council on Fishery Investigations, 1944.....	234

## FISHERIES STATISTICS OF CANADA, 1944

The total value of the production of the fisheries of Canada for the year 1944 was \$89,427,508, an increase of 4.5 p.c. over the 1943 figure of \$85,594,544. These totals represent the value of the product as marketed, whether sold for consumption fresh, domestically prepared or factory made. The quantity landed fell by 4.6 p.c. from 12,358,241 cwt. in 1943 to 11,791,456 cwt. in 1944. Table 1 shows the quantity caught and the value marketed of the chief commercial fishes (those valued at \$300,000 or upwards) for the past five years, with a statement in the final column of the increase or decrease for 1944 compared with 1943, while Table 2 gives the quantity and value of all fish as caught and marketed, for the years 1943 and 1944.

## 1. Quantity Caught and Value Marketed of the Chief Commercial Fishes, Canada, 1940 to 1944

NOTE.—The catch as shown in this table is in each case exclusive of the quantity of livers landed, but the value includes the value of the livers as marketed.

Kind of Fish	1940	1941	1942	1943	1944	Increase or decrease 1944 compared with 1943 Inc. + Dec. —

## CAPITAL EQUIPMENT AND EMPLOYEES

## IN PRIMARY OPERATIONS

*Capital.*—The capital investment, represented by the vessels, boats, nets, traps, piers and wharves, etc., used in the primary operations of catching and landing the fish, had a total value in 1944 of \$35,056,771, of which \$28,483,968 or 81 per cent, is credited to the sea fisheries, and \$6,572,803, or 19 per cent to the inland fisheries. The total amount shows an increase of \$3,936,255 when compared with the year 1943.

*Employees.*—The number of men engaged in fishing during the year was 64,208, comprising 46,421 employed in the sea fisheries and 17,787 in the inland fisheries. There was an increase of 2,749 persons from the previous year, sea fisheries showing a gain of 521 and inland fisheries one of 2,228.

## IN FISH PROCESSING

*Capital.*—The capital investment of the fish processing plants in operation increased from \$30,741,194 in 1943 to \$32,266,989 in 1944. The salmon canneries claim the largest amount with \$10,752,238 or 33 per cent of the whole. The relation which the capital of each classification bears to the total investment is shown by the following table of percentages: salmon canneries, 33 per cent; fish curing establishments, 20 per cent; sardine and other fish canneries, 16 per cent; fresh fish and freezing plants, 15 per cent; reduction plants, 10 per cent and lobster canneries, 5 per cent. The value of the clam canneries represents less than 1 per cent of the total.

*Employees.*—The employees engaged in the fish processing plants in 1944 numbered 17,272, including 9,828 male and 7,444 female employees. This shows an increase of 1,373 when compared with 8,965 male and 6,934 female or 15,899 employees in 1943.

Tables 3 to 6, which follow, contain summaries of capital equipment and employees in the primary operations and in fish processing establishments for Canada. Tables 12 and 13 give the same information by provinces.

Statistics by counties and fishing districts will be found in Tables 32 to 44.

## REVIEW OF THE FISHERIES BY PROVINCES

Tables 7 to 13 show by provinces: the total value of the fisheries; the quantity caught and landed and the value marketed of the chief commercial fishes; the quantity and value of all fish caught and landed and marketed; the total values for counties or districts of sea fish caught and landed and marketed; the quantity of sea fish taken offshore; the capital equipment and the number of employees.

## FISHERIES BOUNTY

Under Authority of "An Act to Encourage the Development of the Sea Fisheries and the Building of Fishing Vessels" the sum of \$160,000 is appropriated annually by the Governor in Council. It is distributed under the name of Fishing Bounty by the Department of Fisheries amongst fishermen and fishing vessel and boat owners on the Atlantic coast, under regulations made from time to time by the Governor in Council.

For the year 1944, payment was made on the following basis:—

To owners of vessels entitled to receive bounty—\$1 per registered ton; payment to the owner of any one vessel not to exceed \$80.

To vessel fishermen entitled to receive bounty—\$7.60 each.

To owners of boats measuring not less than 12 feet keel—\$1 per boat.

To boat fishermen entitled to receive bounty—\$7.15 each.

The total amount paid in 1944 was \$158,232.10 allocated as follows:—

To 823 vessels and their crews.....\$ 40,377.50

To 8,892 boats and their crews.....\$117,854.60

## HISTORICAL REVIEW

The six pages which follow afford a review of the fishing industry of Canada. Tables 14 and 15 show the quantities of fish and shellfish landed since 1918, by main groups and by provinces, respectively. Statistics of the total quantities of fish landed have not previously been given but the interest manifested in the total quantities of food available has rendered it advisable to compile and publish these figures. In the case of the value of production, returns are given, by provinces, back to 1870. In the case of the number and value of vessels, boats, etc., the review extends to 1880, and in the case of the number of employees to 1895.

## FOREIGN TRADE

*Exports.*—The total value of domestic exports of fish and fishery products was \$68,642,641 in 1944, an increase of 13·8 p.c. over the \$60,313,127 recorded for 1943.

Canned salmon led in value (\$11,065,864) followed by whitefish and other freshwater fish, not filleted (\$8,640,465), filleted groundfish (\$7,087,660) and canned sea herring (\$6,020,642); these four leading items accounted for 16·1 p.c., 12·6 p.c., 10·3 p.c. and 8·7 p.c., respectively, of the total value of exports. The salmon was consigned almost entirely to the United Kingdom, the freshwater fish to the United States, the filleted groundfish almost equally between the United Kingdom and the United States and the canned sea herring chiefly to the United Kingdom and British India. Other items, in order of value, were: fresh lobsters, \$5,786,784; canned lobsters, \$3,146,882 and dried cod, \$2,690,646. The total value of fish and sea-mammal oils exported was \$4,773,901. The United States received 60·7 p.c. of the total value of exports and the United Kingdom took 26·7 p.c.

Detailed statistics of exports, by products, are given in Table 53 of this volume.

*Imports.*—Imports totalled \$4,649,161 in 1944, as compared with \$4,261,768 in 1943. Fresh groundfish, nearly all from Newfoundland, was valued at \$920,659, or 20 p.c. of the total imports. Whale oil, valued at \$580,647, was the second most important fisheries import, the supply coming from Newfoundland, the Falkland Islands and the United States. Fresh salmon, chiefly from Newfoundland, was valued at \$450,706.

Detailed statistics of imports, by commodities, are given in Table 54.

Table 21 gives values of exports and imports for the years 1927 to 1944.

## 56. Fishing Bounties Paid to Vessels and Boats for the Season 1944-45

NOTE:—A number of "late" claims amounting in all to \$1,706.80 and which are included in this statement are for the season 1943. As the basis of distribution for 1943 differed from that of 1944, a number of figures in the "amount" columns do not, as a result, balance with the number of claims paid.

Province and County	Number of Boats	Number of Men	Amount Paid	Number of Vessels	Tonnage	Average Tonnage	Number of Men	Amount Paid	Total Bounty Paid to Vessels and Boats

<sup>1</sup> During the year 1944 three trawlers were in operation. <sup>2</sup> Classified as Canadian plaice after 1940.

The following statement, prepared from Canadian fisheries statistics for the year shows the catches by Canadian fishermen in 1944 in certain areas, defined by the North American Council on Fishery Investigations, an international body representative of Canada, United States, Newfoundland and France for the co-ordination of fishery investigations in the Atlantic waters of the Continent. The boundaries of the areas are indicated in the accompanying chart.

# STATISTIQUES DES PÊCHERIES 1944

(En collaboration avec les ministères des Pêcheries du  
Gouvernement fédéral et des Provinces)

Publié par ordre de l'Hon. James A. MacKinnon, M.P.  
Ministre du Commerce

OTTAWA  
EDMOND CLOUTIER, C.M.G., B.A., L.Ph.,  
IMPRIMEUR DU ROI ET CONTRÔLEUR DE LA PAPETERIE  
1946

## PRÉFACE

Ce rapport est publié en vertu d'une entente établissant la collaboration en matière de statistique entre le Bureau Fédéral de la Statistique et les différents services gouvernementaux ayant juridiction sur les pêcheries canadiennes. Ces services comprennent le Ministère Fédéral des Pêcheries, qui exerce sa juridiction sur les pêcheries des Provinces Maritimes, du Yukon et de la Colombie Britannique, et les divisions des Pêcheries des provinces d'Ontario, Québec, Manitoba, Saskatchewan et Alberta, qui régissent les pêcheries de leurs provinces respectives. La Colombie Britannique possède une division des Pêcheries, mais cet organisme ne s'occupe pas de statistique pour son propre compte.

En vertu de l'arrangement dont il est parlé plus haut, les statistiques du poisson pêché et des produits offerts en vente à l'état frais ou après une préparation sommaire, sont recueillies par les fonctionnaires locaux du Ministère des Pêcheries, vérifiées au Ministère des Pêcheries, et condensées et compilées au Bureau Fédéral de la Statistique. En ce qui concerne le poisson industriellement préparé et ses sous-produits, des formules similaires à celles en usage dans le recensement des autres branches de la production sont envoyées directement par le Bureau aux usines poissonnières, les fonctionnaires des services des Pêcheries s'assurant que ces formules sont consciencieusement remplies et promptement retournées. Les fonctionnaires des gouvernements provinciaux voudront bien accepter nos remerciements pour le concours qu'ils nous ont prêté.

Pour des raisons d'économie, les rapports depuis 1938 omettent certains textes et tableaux qui étaient contenus dans l'Introduction des rapports antérieurs et parmi lesquels on peut mentionner l'historique des pêcheries au Canada et le Résumé annuel des conditions de la pêche durant l'année. Les statistiques du commerce extérieur dans les produits de la pêche se limitent à trois tableaux sommaires, car des tableaux détaillés montrant les produits par pays importateur et exportateur sont présentés dans les publications de la Branche du Commerce Extérieur du Bureau Fédéral de la Statistique. Deux nouveaux tableaux montrant les quantités de poisson et de mollusques et crustacés débarqués depuis 1918, par principaux groupes et par province, sont ajoutés au rapport.

Le présent rapport a été préparé sous la direction de M. W. H. Lanceley, chef de la Branche des Pêcheries et des Produits Animaux du Bureau.

HERBERT MARSHALL,  
Statisticien du Dominion

BUREAU FÉDÉRAL DE LA STATISTIQUE,  
OTTAWA, le 1er avril 1946.

## STATISTIQUES DES PÊCHERIES DU CANADA, 1944

La valeur globale de la production des pêcheries au Canada en 1944 est de \$89,427,508, soit une augmentation de 4.5 p.c. sur le montant de \$85,594,544 en 1943. Ces totaux représentent la valeur du produit mis sur le marché, qu'il soit vendu pour la consommation à l'état frais, de préparation domestique, ou conditionné à la fabrique. La quantité débarquée diminue de 4.6 p.c. ou de 12,358,241 cwt en 1943 à 11,791,456 cwt en 1944. Le tableau 1 donne la quantité prise et la valeur sur le marché des principales espèces commerciales de poisson (évaluées à \$300,000 ou plus) pour les cinq dernières années, avec indication dans la dernière colonne de l'augmentation ou de la diminution en 1944, comparativement à 1943, tandis que le tableau 2 donne la quantité et la valeur de tout le poisson pris et vendu des années 1943 et 1944.

## 1. Quantité et valeur marchande des principaux poissons commerciaux, 1940 à 1944

NOTA.—La prise donnée dans ce tableau, en chaque cas, ne comprend pas la quantité de foie débarquée, mais la valeur englobe celle du foie tel que mis sur le marché.

## OUTILLAGE-CAPITAL ET EMPLOYÉS

## DANS LES OPÉRATIONS PRIMAIRES

*Capital.*—Les immobilisations globales en fait de vaisseaux, barques, filets, pièges, quais et môles, etc., employés dans les opérations primaires de la prise et du débarquement du poisson en 1944, sont de \$35,056,771, dont \$28,483,968 ou 81 p.c. pour les pêcheries maritimes et \$6,572,803 ou 19 p.c. pour les pêcheries intérieures. Le montant global indique une augmentation de \$3,936,255 sur l'année 1943.

*Employés.*—Le nombre d'hommes employés à la pêche durant l'année s'élève à 64,208, dont 46,421 dans les pêcheries maritimes et 17,787 pour les pêcheries intérieures. Comparativement à l'an dernier, ce total représente une augmentation de 2,749; les pêcheries maritimes accusent une augmentation de 521 et celles de l'intérieur, une augmentation de 2,228.

## DANS LES CONSERVERIES ET SAURISSERIES

*Capital.*—Les immobilisations globales de l'industrie du conditionnement du poisson ont augmenté de \$30,741,194 en 1943 à \$32,266,989 en 1944. Le plus fort montant va aux saumoneries, soit \$10,752,238 ou 33 p.c. du total. Le rapport entre les immobilisations de chaque groupe et le total est indiqué par les pourcentages suivants: saumoneries, 33 p.c.; saurisséries, 20 p.c.; sardineries et autres conserveries, 16 p.c.; poisson frais et glacières, 15 p.c.; huileries, 10 p.c.; homarderies, 5 p.c. Les immobilisations dans les conserveries de coques représentent moins de 1 p.c. du total.

*Employés.*—Les employés de ces établissements sont au nombre de 17,272 en 1944; dont 9,828 hommes et 7,444 femmes; soit 1,373 employés de plus sur 8,965 hommes et 6,934 femmes ou 15,899 employés en 1943.

Les tableaux 3 à 6 qui suivent montrent en résumé l'outillage-capital et les employés dans les opérations primaires et dans les conserveries et saurisséries pour l'ensemble du Canada; les tableaux 12 et 13 représentent les statistiques par province.

Les statistiques par comté et district se trouvent dans les tableaux 32 à 44 du rapport.

## PRIMES

En vertu d'une "Loi pour encourager le développement des pêcheries maritimes et la construction des navires de pêche", une somme de \$160,000 est donnée en primes chaque année par le Gouverneur en Conseil. Sous le nom de primes de pêches, elles sont distribuées par le Ministère des Pêcheries parmi les pêcheurs et les propriétaires de navires et barques de pêche du littoral de l'Atlantique selon les règlements édictés de temps à autre par le Gouverneur en Conseil.

En 1944 les versements sont effectués sur la base suivante:—

Aux propriétaires de navires de pêche ayant droit à cette prime, \$1 par tonne enregistrée; avec un maximum de \$80 par navire.

A chaque membre de l'équipage ayant droit à la prime, \$7.60.

Aux propriétaires de barques mesurant au moins 12 pieds de quille, \$1 par embarcation.

A chaque pêcheur d'une barque ayant droit à une prime, \$7.15.

Le montant payé en 1944 est de \$158,232.10, réparti comme suit:

A 823 propriétaires de navires et leurs équipages.....\$ 40,377.50

A 8,892 propriétaires de barques et leurs équipages.....\$117,854.60

## REVUE RÉTROSPECTIVE

Les sept tableaux suivants présentent une revue rétrospective de l'industrie de la pêche au Canada. Les tableaux 14 et 15 donnent les quantités de poisson, de mollusques et de crustacés débarqués depuis 1918, par principaux groupes et par province respectivement. Les statistiques sur les quantités globales de poisson débarqués n'ont pas été données antérieurement mais l'intérêt manifesté concernant les quantités de produits alimentaires disponibles rend opportunes la compilation et la publication de ces statistiques. En ce qui concerne la valeur de la production, les données sont établies par province et remontent jusqu'à 1870. Quant au nombre et à la valeur des navires, barques, etc., les chiffres partent de l'année 1880; le personnel qu'emploie cette industrie est donné depuis 1895.

## COMMERCE EXTÉRIEUR

*Exportations.*—La valeur globale des exportations domestiques de poisson et de produits de la pêche est de \$68,642,641 en 1944, soit une augmentation de 13.8 p.c. sur le montant de \$60, 313,127 en 1943.

Le saumon en boîte est la première valeur (\$11,065,864). Suivent: le corégone et autres poissons d'eau douce non en filets (\$8,640,465), le poisson de fond en filets (\$7,087,660), et le hareng de mer en boîte (\$6,020,642). Ces quatre items principaux représentent respectivement 16.1 p.c., 12.6 p.c., 10.3 p.c., et 8.7 p.c. de la valeur globale des exportations. Le saumon est consigné presque entièrement au Royaume-Uni; le poisson d'eau douce, aux Etats-Unis; le poisson de fond en filets, à peu près également entre le Royaume-Uni et les Etats-Unis; et le hareng de mer en boîte, principalement au Royaume-Uni et à l'Inde britannique. Les autres items sont, par ordre de valeur: le homard à l'état frais, \$5,786,784; le homard en boîte, \$3,146,882; et la morue séchée, \$2,690,646. La valeur globale du poisson et des huiles de mammifères marins exportés est de \$4,773,901. Les Etats-Unis ont reçu 60.7 p.c. de la valeur globale des exportations et le Royaume-Uni, 26.7 p.c.

Des statistiques détaillées sur les exportations, par produit, sont données au tableau 53 du présent volume.

*Importations.*—Les importations se totalisent à \$4,649,161 en 1944, au regard de \$4,261,768 en 1943. Le poisson de fond à l'état frais, qui provient presque tout de Terre-Neuve, est évalué à \$920,659 ou 20 p.c. de toutes les importations. L'huile de baleine, évaluée à \$580,647, est la seconde en importance des importations des pêcheries, l'approvisionnement étant fourni par Terre-Neuve, Falkland Islands et les Etats-Unis. Le saumon frais provenant surtout de Terre-Neuve, est évalué à \$450,706.

Des statistiques détaillées sur les importations, par denrée, se trouvent au tableau 54.

Le tableau 21 donne la valeur des exportations et des importations, pour les années écoulées de 1927 à 1944.

**21. Valeur des exportations et des importations de poisson et de produits poissonniers, années terminées le 31 décembre, 1927 à 1944**

## Tableau de conversion de la pesée du poisson

Dans ce tableau, dans le cas de la morue, de l'églefin, de la merluche, du brosmius, et du merlan on entend par poisson frais le poisson dont on a enlevé les entrailles et non la tête. Le poids du flétan est pris après l'enlèvement de la tête et des entrailles. Dans le cas de l'espadon et du thon le poids comprend le poisson après l'enlèvement de la tête, de la queue et des entrailles. Pour tous les autres poissons le terme "poisson frais" signifie le poisson tel qu'il est sorti de l'eau.

## MORUE, EGLEFIN, MERLUCHE ET BROSMIUS OU MERLAN

- 300 lb de poisson frais donnent 1 cwt de filets frais.
- 105 lb de poisson frais donnent une caisse de poisson en boîte.
- 200 lb de poisson frais donnent 1 cwt de poisson salé vert.
- 300 lb de poisson frais donnent 1 cwt de filets fumés.
- 200 lb de poisson frais donnent 1 cwt de poisson fumé.
- 300 lb de poisson frais donnent 1 cwt de poisson séché.
- 400 lb de poisson frais donnent 1 cwt de poisson désossé.

## HARENG

- 70 lb de poisson frais donnent une caisse de hareng en boîte.
- 200 lb de poisson frais donnent 1 cwt de hareng fumé.
- 300 lb de poisson frais donnent un baril de hareng saumuré.
- 200 lb de poisson frais donnent un baril de boëtte (fraîche ou salée).
- 200 lb de poisson frais donnent un baril d'engrais.
- 115 lb de poisson frais donnent 1 cwt de hareng salé à sec.

## MAQUEREAU OU ALOSE

- 70 lb de poisson frais donnent une caisse de poisson en boîte.
- 300 lb de poisson frais donnent un baril de poisson saumuré.
- 400 lb de poisson frais donnent un baril de filets de maquereau salés.

## SARDINE

- Un baril de poisson frais donne de 4 à 5 caisses de poisson en boîte.
- Une caisse de 25 livres équivaut à 100 boîtes de  $\frac{1}{4}$  de lb chacune.

## PILCHARD

- 70 lb de poisson frais donnent une caisse de poisson en boîte.
- 200 lb de poisson frais donnent un baril de boëtte.

## GASPAROT

- 200 lb de poisson frais donnent 1 cwt de poisson fumé.
- 275 lb de poisson frais donnent un baril de poisson saumuré.

## SAUMON

- 80 lb de poisson frais (Pacifique) donnent une caisse de 48 lb de poisson en boîte.
- 70 lb de poisson frais (Atlantique) donnent une caisse de 48 lb de poisson en boîte.
- 170 lb de poisson frais donnent 1 cwt de poisson fumé.
- 125 lb de poisson frais donnent 1 cwt de poisson salé à sec.
- 150 lb de poisson frais donnent 1 cwt de poisson fumé doux.
- 150 lb de poisson frais donnent 1 cwt de poisson saumuré.

## THON

- 100 lb de poisson frais donnent une caisse de poisson en boîte.

## COQUES

*Littoral de l'Atlantique—*

- 200 lb de coques fraîches donnent une caisse de coques en boîtes (48 boîtes de 5 onces de chair chacune).

*Littoral de Pacifique—*

- Couteaux.—80 lb de chair fraîche donnent une caisse de chair en boîte (48 boîtes de 6 onces de chair chacune).
- Praires du Pacifique, amandes de mer, etc.—150 lb de chair fraîche donnent une caisse de chair en boîte. (48 boîtes de 6 onces de chair chacune).

## CRABES

*Littoral du Pacifique—*

- 100 lb de crabe frais (environ 6 douzaines) donnent une caisse de chair en boîte (48 boîtes de 6½ onces de chair égouttée chacune).

## HOMARD

- 200 lb de homard frais donnent une caisse de homard en boîte (48 boîtes de 12 onces de chair chacune).
- 500 lb de homard frais donnent 1 cwt de chair.

## PREFACE

This Report is issued under an arrangement for statistical co-operation between the Dominion Bureau of Statistics and the Government departments having jurisdiction with regard to fisheries throughout Canada. These departments comprise: the Dominion Fisheries Department which exercises jurisdiction over the fisheries of the Maritime Provinces, Yukon and Northwest Territories and British Columbia and the Fisheries Branches of departments of Ontario, Quebec, Manitoba, Saskatchewan and Alberta which have jurisdiction over the fisheries of their respective provinces. The Province of British Columbia has a Fisheries Branch, but it does not engage in independent statistical work.

Under the arrangement above referred to, the statistics of the catch, and of the products marketed in a fresh state or domestically prepared, are collected by the local fisheries officers, checked in the Department of Fisheries, and co-ordinated and compiled in the Dominion Bureau of Statistics. In the case of manufactured fish products, schedules in conformity with those of other sections of the Census of Industry are sent by the Bureau to the operators of canneries, fish-curing establishments, etc., the fisheries officers assisting in securing an expeditious and accurate return. The grateful acknowledgments of the Bureau are tendered to the officers of the provincial governments who co-operate in these arrangements.

For reasons of economy, the volumes since 1938 omit certain reading matter and tables which were contained in the Introduction of earlier reports, among which may be mentioned the short history of the fisheries of Canada and the annual review of fishing conditions during the year. Statistics of external trade in fisheries products are limited to three summary tables, as detailed tables showing commodities by countries of import and export are presented in the publications of the External Trade Division of the Dominion Bureau of Statistics.

Statistics for Saskatchewan represent the quantity marketed, whether in the round or dressed form. As no distinction was made between the two forms, any figures of landings are underestimated by the amount lost in dressing.

This report was prepared under the direction of Mr. W. H. Lanceley, Chief of the Fisheries and Animal Products Statistics of the Bureau.

HERBERT MARSHALL,  
*Dominion Statistician.*

DOMINION BUREAU OF STATISTICS,  
OTTAWA, JULY 7, 1948.

## TABLE FOR CONVERSION OF WEIGHTS OF FISH

Fresh fish in this table in the case of cod, haddock, hake, cusk and pollock, means fish with the head on and the entrails removed. The weight of halibut is to be the weight minus head and entrails. In case of swordfish and tuna, it means fish with the head, tail and entrails removed. In all other cases, fresh fish means fish as it comes from the water.

### COD, HADDOCK, HAKE, CUSK OR POLLOCK

300 lb. of fresh produce one cwt. of fresh fillets.  
 105 lb. of fresh produce one case of canned.  
 200 lb. of fresh produce one cwt. of green salted.  
 300 lb. of fresh produce one cwt. of smoked fillets.  
 200 lb. of fresh produce one cwt. of smoked.  
 300 lb. of fresh produce one cwt. (100 lb.) of dried.  
 400 lb. of fresh produce one cwt. of boneless.

### HERRING

70 lb. of fresh produce one case of canned.  
 200 lb. of fresh produce one cwt. of smoked.  
 300 lb. of fresh produce one barrel of pickled.  
 200 lb. of fresh produce one barrel of bait (fresh or salted)  
 200 lb. of fresh produce one barrel of fertilizer.  
 115 lb. of fresh produce one cwt. of dry salted.

### MACKEREL OR SHAD

70 lb. of fresh produce one case of canned.  
 300 lb. of fresh produce one barrel of pickled.  
 400 lb. of fresh produce one barrel of salt mackerel fillets.

### SARDINES

One barrel of fresh produces 4 to 5 cases canned.  
 (One case of 25 lb. equals 100 tins of  $\frac{1}{4}$  lb. each.)

### PILCHARDS

70 lb. of fresh produce one case of canned.  
 200 lb. of fresh produce one barrel of bait.

### ALEWIVES

200 lb. of fresh produce one cwt. of smoked.  
 275 lb. of fresh produce one barrel of pickled.

### SALMON

75 lb. of fresh (Pacific) produce one 48-lb. case canned.  
 70 lb. of fresh (Atlantic) produce one 48-lb. case canned.  
 170 lb. of fresh produce one cwt. of smoked.  
 125 lb. of fresh produce one cwt. of dry salted.  
 150 lb. of fresh produce one cwt. of mild cured.  
 150 lb. of fresh produce one cwt. of pickled.

### TUNA

100 lb. of fresh produce one case canned.

### CLAMS

*Atlantic Coast*—200 lb. of fresh produce one case of canned (48 tins of 5 oz. of clam meat each).  
*Pacific Coast*—

Razor clams—80 lb. of fresh produce one case of canned (48 tins of 6 oz. of clam meat each).  
 Little neck, butter clams, etc.—150 lb. of fresh produce one case of canned. (48 tins of 6 oz. of clam meat each).

### CRABS

*Pacific Coast*—100 lb. of fresh (approximately 6 dozen) produce one case of canned (48 tins of  $6\frac{1}{2}$  oz. each of drained crab meat).

### LOBSTERS

200 lb. of fresh produce one case of canned (48 tins of 12 oz. of lobster meat each).  
 500 lb. of fresh produce one cwt. of lobster meat.

## Detailed Tables

Fish Caught and Marketed, by Provinces, 1946—	
21. Prince Edward Island, 56; 22. Nova Scotia, 60; 23. New Brunswick, 100; 24. Quebec, 116; 25. Ontario, 130; 26. Manitoba, 132; 27. Saskatchewan, 136; 28. Alberta, 138; 29. Yukon, 138; 30. Northwest Territories, 139; 31. British Columbia, 140.	
Capital Equipment and Employment in Primary Operations, by Provinces, 1946—	
32. Prince Edward Island, 156; 33. Nova Scotia, 158; 34. New Brunswick, 170; 35. Quebec, 176; 36. Ontario, 184; 37. Manitoba, 186; 38. Alberta, Yukon and Northwest Territories, 188; 39. British Columbia, 190.	
Summary Statistics of Fish Processing Establishments, by Provinces, 1946—	
40. Summary Statistics, 196; 41. Establishments by Value of Production, 202; 42. Wage Earners, by Months, 204; 43. Fuel and Electricity Used, 206; 44. Power Equipment, 208.	
Vessels Fishing for Principal Kinds of Sea Fish, 1946—	
45. Prince Edward Island, 210; 46. Nova Scotia, 210; 47. New Brunswick, 218; 48. Quebec, 220; 49. British Columbia, 222.	
Miscellaneous—	
50. Fishery Exports, by Kind of Fish, 1944-46.....	226
51. Fishery Imports, by Kind of Fish, 1944-46.....	227
52. Fishery Exports, by Countries, 1944-46.....	229
53. Fishery Bounties Paid, Season, 1946-47.....	230
54. Salmon Pack of British Columbia, by Districts and Species, 1946.....	230
55. Salmon Pack of British Columbia, by Species, 1937-46.....	231
56. Lobster Pack, by Provinces, 1926-46.....	231
57. Production of Fish Oils, 1942-46.....	231
58. Production of Fish Meal, 1942-46.....	233
59. Steam Trawler Landings, Atlantic Coast, 1942-46.....	233
60. Fisheries Production in Areas Defined by North American Council on Fishery Investigations, 1946.....	234

## FISHERIES STATISTICS OF CANADA, 1946

The total value of the production of the fisheries of Canada for the year 1946 was \$121,124,733, an increase of 6.4 p.c. over the 1945 figure of \$113,871,100. These totals represent the value of the product as marketed, whether sold for consumption fresh, domestically prepared or factory made. The quantity landed decreased by 1.5 p.c. from 13,371,809 cwt. in 1945 to 13,186,335 cwt. in 1946. Table 1 shows the quantity caught and the value marketed of the chief commercial fishes (those valued at \$400,000 or upwards) for the past five years, with a statement in the final column of the increase or decrease for 1946 compared with 1945, while Table 2 gives the quantity and value of all fish as caught and marketed, for the years 1945 and 1946.

## 1. Quantity Caught and Value Marketed of the Chief Commercial Fishes, 1942 to 1946

NOTE.—The catch as shown in this table is in each case exclusive of the quantity of livers landed, but the value includes the value of the livers as marketed.

## CAPITAL EQUIPMENT AND EMPLOYEES

## IN PRIMARY OPERATIONS

*Capital.*—The capital investment, represented by the vessels, boats, nets, traps, piers and wharves, etc., used in the primary operations of catching and landing the fish, had a total value in 1946 of \$47,413,221, of which \$39,473,378 or 83 per cent, is credited to the sea fisheries, and \$7,939,843 or 17 per cent to the inland fisheries. The total amount shows an increase of \$6,469,642 when compared with the year 1945.

*Employees.*—The number of men engaged in fishing during the year was 73,514, comprising 51,961 employed in the sea fisheries and 21,553 in the inland fisheries. There was an increase of 5,803 persons from the previous year, sea fisheries showing a gain of 3,963 and inland fisheries one of 1,840.

## IN FISH PROCESSING

*Capital.*—In line with the practice adopted throughout the Census of Industry, figures of present capital value are no longer collected.

*Employees.*—The employees engaged in the fish processing plants in 1946 numbered 19,396, including 11,454 male and 7,942 female employees. This shows an increase of 1,895 when compared with 9,960 male and 7,541 female or 17,501 employees in 1945.

Tables 3 to 5, which follow, contain summaries of capital equipment and employees in the primary operations and in fish-processing establishments for Canada. Tables 11 and 12 give the same information by provinces.

Statistics by counties and fishing districts will be found in Tables 32 to 42.

## FISHERIES BOUNTY

Under Authority of "An Act to Encourage the Development of the Sea Fisheries and the Building of Fishing Vessels" the sum of \$160,000 is appropriated annually by the Governor in Council. It is distributed under the name of Fishing Bounty by the Department of Fisheries amongst fishermen and fishing vessel and boat owners on the Atlantic coast, under regulations made from time to time by the Governor in Council.

For the year 1946, payment was made on the following basis:—

To owners of vessels entitled to receive bounty—\$1 per registered ton; payment to the owner of any one vessel not to exceed \$80.

To vessel fishermen entitled to receive bounty—\$7.35 each.

To owners of boats measuring not less than 12 feet keel—\$1 per boat.

To boat fishermen entitled to receive bounty—\$6.80.

The total amount paid in 1946 was \$159,992.85 allocated as follows:—

To 956 vessels and their crews.....\$ 45,498.15

To 9,063 boats and their crews.....\$114,494.70

## HISTORICAL REVIEW

The six pages which follow afford a review of the fishing industry of Canada. Tables 13 and 14 show the quantities of fish and shellfish landed since 1918, by main groups and by provinces, respectively. In the case of the value of production, returns are given, by provinces, back to 1870. In the case of the number and value of vessels, boats, etc., the review extends to 1880, and in the case of the number of employees to 1895.

<sup>1</sup> Includes figures for Northwest Territories in 1946.

## FOREIGN TRADE

*Exports.*—The total value of the domestic exports of fish and fishery products was \$88,679,080 in 1946, an increase of 4.6 p.c. over the \$84,800,563 recorded for 1945.

Canned salmon led in value (\$12,330,780), followed by canned sea herring (\$10,218,511), fresh lobsters (\$9,572,446), cod fillets, fresh and frozen (\$7,400,729), canned lobsters (\$3,781,122), whitefish, fresh and frozen, not filleted (\$3,584,757) and cod, dried, n.o.p. (\$3,452,151). These seven leading items accounted for 13.9 p.c., 11.5 p.c., 10.8 p.c., 8.3 p.c., 4.3 p.c., 4.0 p.c. and 3.9 p.c., respectively, of the total value of exports.

Most of the canned salmon was consigned to the United Kingdom, Jamaica receiving the next greatest quantity. The canned herring went to the U.S.S.R., the Philippine Islands, Poland, the United States and Italy. All of the fresh and most of the canned lobsters went to the United States, as did the fresh and frozen whitefish. The cod fillets went to the United States, France and the United Kingdom while the dried product went to the United States, Puerto Rico and the British Caribbean islands.

Of the total value of fisheries exports, the United States received 58.8 p.c. and the United Kingdom 15.0 p.c.

Detailed statistics of exports, by products, are given in Table 50 of this volume.

*Imports.*—The imports totalled \$7,242,416 in 1946, as compared with \$5,695,778 in 1945. Fresh groundfish, nearly all from Newfoundland, valued at \$1,315,832 was the most important single item. Whale oil was second in importance with a value of \$1,275,394 and came from Newfoundland, Norway and the United States.

Detailed statistics of imports, by products, are given in Table 51.

Table 20 gives values of exports and imports for the years 1927 to 1946.

20. Value of Exports and Imports of Fish and Fishery Products in the years ending December 31, 1927 to 1946

NOTE:—A number of late claims amounting in all to \$1,885.40 which are included in this statement are for the season of 1945.

As the basis of distribution for 1945 differed from that of 1946 a number of figures in the "Amount" column do not, as a result, balance with the number of claims paid.

<sup>1</sup> During the year 1946 eleven trawlers were in operation.<sup>2</sup> Not given separately prior to 1943.

The following statement prepared from Canadian fisheries statistics for the year shows the catches by Canadian fishermen in 1946 in certain areas, defined by the North American Council on Fishery Investigations, an international body representative of Canada, United States, Newfoundland and France for the co-ordination of fishery investigations in the Atlantic waters of the Continent. The boundaries of the areas are indicated in the accompanying chart.

# STATISTIQUE DES PÊCHERIES 1946

(En collaboration avec les ministères des Pêcheries du  
gouvernement fédéral et des provinces)

Publié par ordre du très hon. C. D. Howe, M.P.,  
Ministre du Commerce

OTTAWA  
EDMOND CLOUTIER, C.M.G., B.A., L.Ph.,  
IMPRIMEUR DE SA TRÈS EXCELLENTE MAJESTÉ LE ROI  
CONTRÔLEUR DE LA PAPETERIE  
1949

## PRÉFACE

Le présent rapport est publié en vertu d'une entente établissant la collaboration en matière de statistique entre le Bureau fédéral de la statistique et les différents services administratifs ayant juridiction sur les pêcheries canadiennes. Ces services comprennent le ministère fédéral des Pêcheries, qui exerce sa juridiction sur les pêcheries des Provinces maritimes, du Yukon et de la Colombie-Britannique, et les divisions des Pêcheries des provinces d'Ontario, Québec, Manitoba, Saskatchewan et Alberta, qui régissent les pêcheries de leur province respective. Il y a en Colombie-Britannique une division des Pêcheries, mais cet organisme ne s'occupe pas de statistique pour son propre compte.

En vertu de cette entente, les statistiques du poisson pêché et des produits vendus à l'état frais ou après une préparation sommaire, sont recueillies par les fonctionnaires locaux du ministère des Pêcheries, vérifiées au ministère des Pêcheries et condensées et compilées au Bureau fédéral de la statistique. En ce qui concerne le poisson industriellement préparé et ses sous-produits, des formules semblables à celles qui sont en usage dans le recensement des autres branches de la production sont envoyées directement par le Bureau aux usines poissonnières, les fonctionnaires des services des pêcheries veillant à ce qu'elles soient consciencieusement remplies et promptement retournées. Les fonctionnaires des gouvernements provinciaux voudront bien accepter nos remerciements pour le concours qu'ils nous ont prêté.

Pour des raisons d'économie, les rapports, depuis 1938, omettent certains textes et tableaux qui étaient contenus dans l'introduction des rapports antérieurs et parmi lesquels on peut mentionner l'historique des pêcheries au Canada et le résumé annuel des conditions de la pêche durant l'année. Les statistiques du commerce extérieur des produits de la pêche se limitent à trois tableaux sommaires, car des tableaux détaillés montrant les produits par pays importateur et exportateur sont présentés dans les publications de la Division du commerce extérieur du Bureau fédéral de la statistique. Les statistiques de la Saskatchewan représentent la quantité vendue, soit comme poisson entier ou comme poisson habillé. Comme aucune distinction n'a été établie entre ces deux formes, le poids des débarquements est diminué par la quantité perdue à l'habillage.

Le présent rapport a été préparé sous la direction de M. W. H. Lanceley, chef, Statistique des pêcheries et des produits animaux du Bureau.

HERBERT MARSHALL,  
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,  
OTTAWA, le 7 juillet 1948.

## STATISTIQUE DES PÊCHERIES DU CANADA, 1946

La valeur globale de la production des pêcheries au Canada en 1946 est de \$121,124,733, soit une augmentation de 6.4 p. 100 sur le montant de \$113,871,100 en 1945. Ces totaux représentent la valeur du produit vendu, soit pour la consommation à l'état frais, de préparation domestique, ou conditionné à la fabrique. La quantité débarquée diminue de 1.5 p. 100 ou de 13,371,809 cwt en 1945 à 13,186,335 cwt en 1946. Le tableau 1 donne la quantité prise et la valeur sur le marché des principales espèces commerciales de poisson (évaluées à \$400,000 ou plus) pour les cinq dernières années, avec indication dans la dernière colonne de l'augmentation ou de la diminution en 1946, comparativement à 1945, tandis que le tableau 2 donne la quantité et la valeur de tout le poisson pris et vendu des années 1945 et 1946.

## 1. Quantité et valeur marchande des principaux poissons commerciaux, 1942 à 1946

NOTA.—La prise donnée dans ce tableau ne tient compte, en aucun cas, de la quantité de foies débarquée, mais la valeur comprend celle des foies tels que vendus.

## OUTILLAGE ET EMPLOYÉS

## DANS LES OPÉRATIONS PRIMAIRES

*Capital.*—Les immobilisations globales en fait de vaisseaux, barques, filets, pièges, quais et môles, etc., employés dans les opérations primaires de la prise et du débarquement du poisson en 1946, sont de \$47,413,221, dont \$39,473,378 ou 83 p. 100 pour les pêcheries maritimes et \$7,939,843 ou 17 p. 100 pour les pêcheries intérieures. Le montant global indique une augmentation de \$6,469,642 sur l'année 1945.

*Employés.*—Le nombre d'hommes employés à la pêche durant l'année s'élève à 73,514, dont 51,961 dans les pêcheries maritimes et 21,553 dans les pêcheries intérieures. Comparativement à l'année précédente, ce total représente une augmentation de 5,803; les pêcheries maritimes accusent une augmentation de 3,963 et celles de l'intérieur, de 1,840.

## DANS LE CONDITIONNEMENT

*Capital.*—Conformément à la pratique adoptée au recensement de l'industrie, les chiffres sur la valeur des immobilisations ne sont plus recueillis.

*Employés.*—Les employés de ces établissements sont au nombre de 19,396 en 1946 dont 11,454 hommes et 7,942 femmes, soit 1,895 employés de plus sur 9,960 hommes et 7,541 femmes ou 17,501 employés en 1945.

Les tableaux 3 à 5 qui suivent montrent en résumé l'outillage et les employés dans les opérations primaires et dans les établissements de conditionnement pour l'ensemble du Canada. Les tableaux 11 et 12 représentent les statistiques par province.

Les statistiques par comté et district se trouvent dans les tableaux 32 à 42 du rapport.

## PRIMES

En vertu d'une "Loi pour encourager le développement des pêcheries maritimes et la construction des navires de pêche", une somme de \$160,000 est donnée en primes chaque année par le gouverneur en conseil. Sous le nom de primes de pêches, elles sont distribuées par le ministère des Pêcheries aux pêcheurs et aux propriétaires de navires et barques de pêche du littoral de l'Atlantique selon les règlements édictés de temps à autre par le gouverneur en conseil.

En 1946 les versements sont effectués sur la base suivante:—

Aux propriétaires de navires de pêche ayant droit à cette prime, \$1 par tonne enregistrée; avec un maximum de \$80 par navire.

A chaque membre de l'équipage ayant droit à la prime, \$7.35.

Aux propriétaires de barques mesurant au moins 12 pieds de quille, \$1 par embarcation.

A chaque pêcheur d'une barque ayant droit à une prime, \$6.80.

Le montant payé en 1946 est de \$159,992.85, réparti comme suit:

A 956 propriétaires de navires et leurs équipages.....\$ 45,498.15

A 9,063 propriétaires de barques et leurs équipages.....\$114,494.70

## REVUE RÉTROSPECTIVE

Les sept tableaux suivants présentent une revue rétrospective de l'industrie de la pêche au Canada. Les tableaux 13 et 14 donnent les quantités de poisson, de mollusques et de crustacés débarquées depuis 1918, par principaux groupes et par province respectivement. Les statistiques sur les quantités globales de poisson débarquées n'ont pas été données antérieurement mais l'intérêt manifesté au sujet des quantités de produits alimentaires disponibles justifie la compilation et la publication de ces statistiques. En ce qui concerne la valeur de la production, les chiffres sont donnés par province et remontent jusqu'à 1870. Quant au nombre et à la valeur des navires, barques, etc., les chiffres partent de l'année 1880; le personnel qu'emploie cette industrie est donné depuis 1895.

## COMMERCE EXTÉRIEUR

*Exportations.*—La valeur globale des exportations domestiques de poisson et de produits de la pêche est de \$88,679,080 en 1946, augmentation de 4.6 p. 100 sur le montant de \$84,800,563 en 1945.

Le saumon en boîte accuse la plus forte valeur (\$12,330,780), suivi du hareng de mer en boîte (\$10,218,511), du homard frais (\$9,572,446), du filet de morue, frais et gelé (\$7,400,729), du homard en boîte (\$3,781,122), du corégone, frais et gelé, non en filets (\$3,584,757) et de la morue séchée, n.a.é. (\$3,452,151). Ces sept variétés principales représentent respectivement 13.9 p. 100, 11.5 p. 100, 10.8 p. 100, 8.3 p. 100, 4.3 p. 100, 4.0 p. 100 et 3.9 p. 100 de la valeur globale des exportations.

La plus grande partie du saumon en boîte est consignée au Royaume-Uni et la Jamaïque reçoit ensuite la plus grande quantité. Le hareng en boîte va à l'U.R.S.S., les îles Philippines, la Pologne, les Etats-Unis et l'Italie. Les Etats-Unis achètent tout le homard frais et la plus grande partie du homard en boîte, ainsi que le corégone frais et gelé. Le filet de morue va aux Etats-Unis, à la France et au Royaume-Uni, tandis que la morue séchée est exportée aux Etats-Unis, à Porto-Rico et aux îles Caraïbes britanniques.

Les Etats-Unis ont reçu 58.8 p. 100 de la valeur globale des exportations de poisson et le Royaume-Uni, 15.0 p. 100.

Des statistiques détaillées sur les exportations, par produit, sont données au tableau 50 du présent volume.

*Importations.*—Les importations atteignent en 1946 le total de \$7,242,416, au regard de \$5,695,778 en 1945. Le poisson de fond à l'état frais, provenant presque en entier de Terre-Neuve, est le produit le plus important avec une valeur de \$1,315,832. L'huile de baleine en provenance de Terre-Neuve, de la Norvège et des Etats-Unis, est deuxième en importance avec une valeur de \$1,275,394.

Des statistiques détaillées sur les importations, par denrée, se trouvent au tableau 51.

Le tableau 20 donne la valeur des exportations et des importations pour les années écoulées de 1927 à 1946.

**20. Valeur des exportations et des importations de poisson et de produits poissonniers, années terminées le 31 décembre, 1927 à 1946**

Année	Exportations	Importations	Année	Exportations	Importations
	\$	\$		\$	\$
1927.....	34,814,448	3,768,901	1937.....	28,902,152	2,877,131

## Tableau de conversion de la pesée du poisson

Dans ce tableau, dans le cas de la morue, de l'églefin, de la merluche, du brosmius, et du merlan, on entend par poisson frais le poisson dont on a enlevé les entrailles et non la tête. Le poids du flétan est pris après l'enlèvement de la tête et des entrailles. Dans le cas de l'espadon et du thon le poids comprend le poisson après l'enlèvement de la tête, de la queue et des entrailles. Pour tous les autres poissons le terme "poisson frais" signifie le poisson tel qu'il est sorti de l'eau.

## MORUE, ÉGLEFIN, MERLUCHE ET BROSMIUS OU MERLAN

- 300 liv. de poisson frais donnent 1 cwt de filets frais
- 105 liv. de poisson frais donnent une caisse de poisson en boîte.
- 200 liv. de poisson frais donnent 1 cwt de poisson salé vert.
- 300 liv. de poisson frais donnent 1 cwt de filets fumés.
- 200 liv. de poisson frais donnent 1 cwt de poisson fumé.
- 300 liv. de poisson frais donnent 1 cwt de poisson séché.
- 400 liv. de poisson frais donnent 1 cwt de poisson désossé.

## HARENG

- 70 liv. de poisson frais donnent une caisse de hareng en boîte.
- 200 liv. de poisson frais donnent 1 cwt de hareng fumé.
- 300 liv. de poisson frais donnent un baril de hareng saumuré.
- 200 liv. de poisson frais donnent un baril de boîte (fraîche ou salée).
- 200 liv. de poisson frais donnent un baril d'engrais.
- 115 liv. de poisson frais donnent 1 cwt de hareng salé à sec.

## MAQUEREAU OU ALOSE

- 70 liv. de poisson frais donnent une caisse de poisson en boîte.
- 300 liv. de poisson frais donnent un baril de poisson saumuré.
- 400 liv. de poisson frais donnent un baril de filets de maquereau salés.

## SARDINE

- Un baril de poisson frais donne de 4 à 5 caisses de poisson en boîte.
- Une caisse de 25 livres équivaut à 100 boîtes de  $\frac{1}{4}$  de liv. chacune.

## PILCHARD

- 70 liv. de poisson frais donnent une caisse de poisson en boîte.
- 200 liv. de poisson frais donnent un baril de boîte.

## GASPAROT

- 200 liv. de poisson frais donnent 1 cwt de poisson fumé.
- 275 liv. de poisson frais donnent un baril de poisson saumuré.

## SAUMON

- 75 liv. de poisson frais (Pacifique) donnent une caisse de 48 liv. de poisson en boîte.
- 70 liv. de poisson frais (Atlantique) donnent une caisse de 48 liv. de poisson en boîte.
- 170 liv. de poisson frais donnent 1 cwt de poisson fumé.
- 125 liv. de poisson frais donnent 1 cwt de poisson salé à sec.
- 150 liv. de poisson frais donnent 1 cwt de poisson fumé doux.
- 150 liv. de poisson frais donnent 1 cwt de poisson saumuré.

## THON

- 100 liv. de poisson frais donnent une caisse de poisson en boîte.

*Littoral de l'Atlantique—*

## COQUES

- 200 liv. de coques fraîches donnent une caisse de coques (48 boîtes de 5 onces de chair chacune).

*Littoral du Pacifique—*

- Couteaux.—80 liv. de chair fraîche donnent une caisse de chair en boîte (48 boîtes de 6 onces de chair chacune).

- Praire du Pacifique, amandes de mer, etc.—150 liv. de chair fraîche donnent une caisse de chair en boîte. (48 boîtes de 6 onces de chair chacune).

*Littoral du Pacifique—*

## CRABES

- 100 liv. de crabe frais (environ 6 douzaines) donnent une caisse de chair en boîte (48 boîtes de  $6\frac{1}{2}$  onces de chair égouttée chacune).

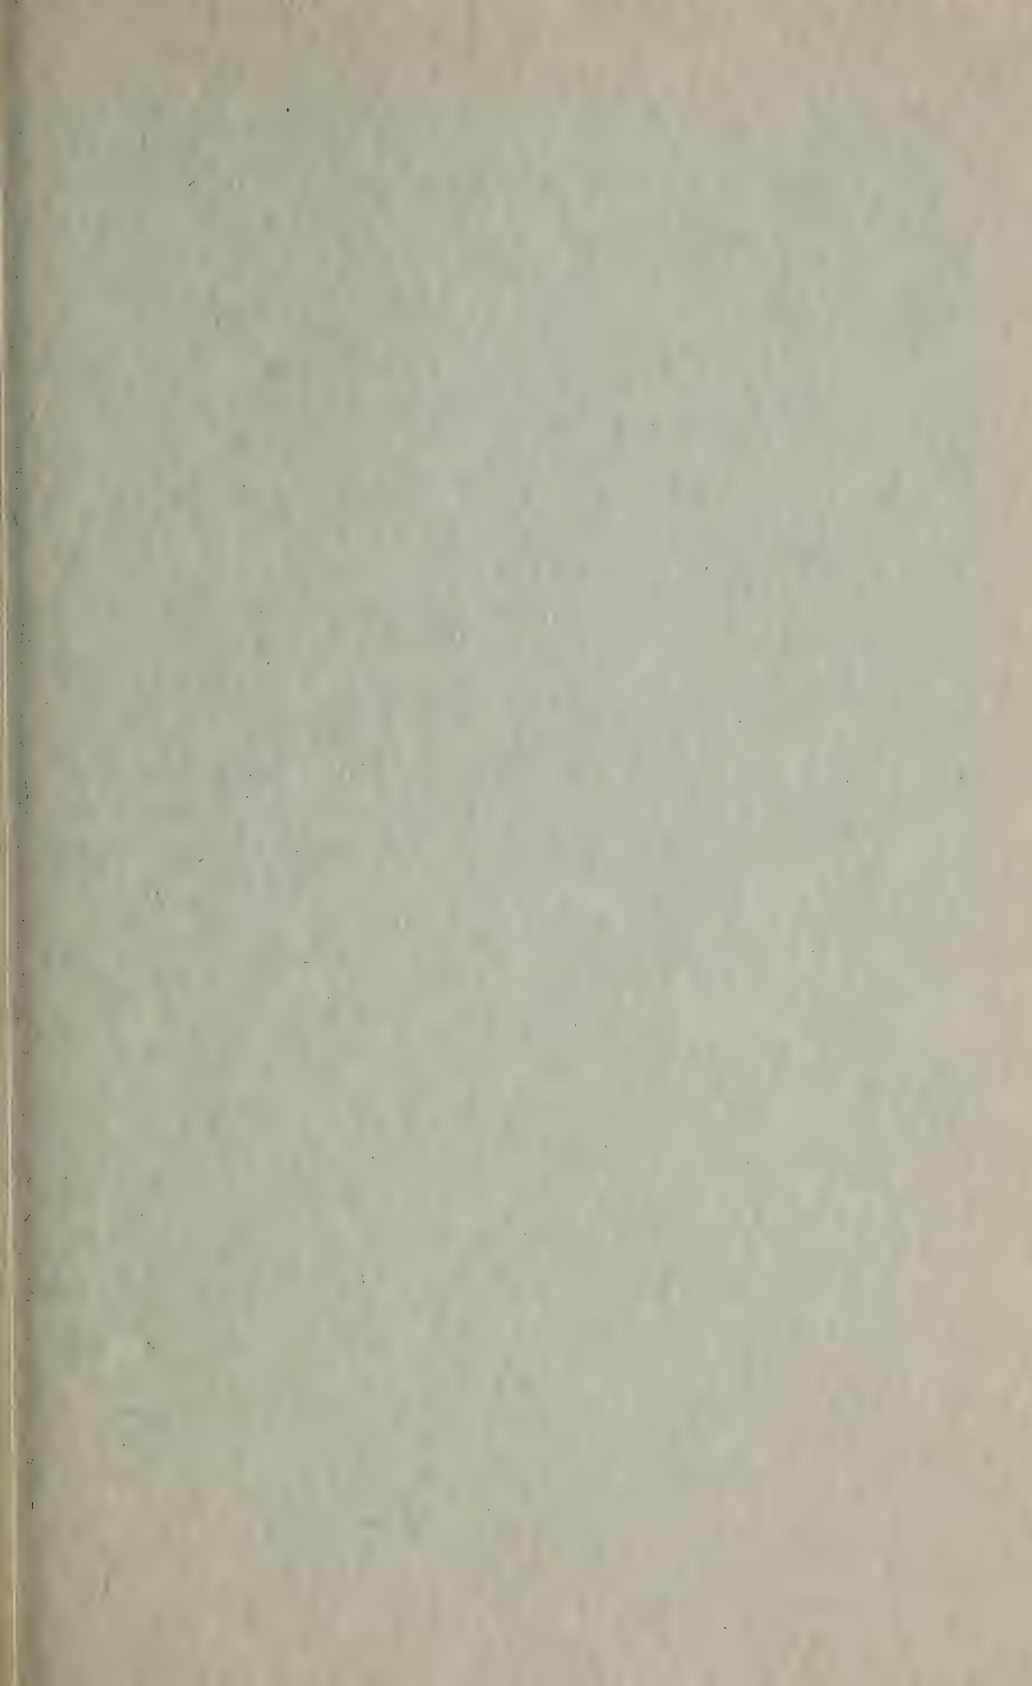

## HOMARD

- 200 liv. de homard frais donnent une caisse de homard en boîte (48 boîtes de 12 onces de chair chacune).
- 500 liv. de homard frais donnent 1 cwt de chair.

## PREFACE

This report is issued under an arrangement for statistical co-operation between the Dominion Bureau of Statistics and the government departments having jurisdiction with regard to fisheries throughout Canada. These departments comprise the Dominion Fisheries Department, which exercises jurisdiction over the fisheries of the Maritime Provinces, Yukon and Northwest Territories and British Columbia, and the Fisheries Branches of departments of Ontario, Quebec, Manitoba, Saskatchewan and Alberta, which have jurisdiction over the fisheries of their respective provinces.

Under the arrangement above referred to, the statistics of the catch, and of the products marketed in a fresh state or domestically prepared, are collected by the local fisheries officers, checked in the Department of Fisheries, and co-ordinated and compiled in the Dominion Bureau of Statistics. In the case of manufactured fish products, schedules in conformity with those of other sections of the Census of Industry are sent by the Bureau to the operators of canneries, fish curing establishments, etc., the fisheries officers assisting in securing an expeditious and accurate return. The grateful acknowledgments of the Bureau are tendered to the officers of the provincial governments who co-operate in these arrangements.

Statistics of external trade in fisheries products are limited to three summary tables, as detailed tables showing commodities by countries of import and export are presented in the publications of the External Trade Division of the Dominion Bureau of Statistics.

Statistics for Saskatchewan represent the quantity marketed, whether in the round or dressed form. As no distinction was made between the two forms, any figures of landings are underestimated by the amount lost in dressing.

Details of county and district figures in provincial tables are omitted in this edition, but may be obtained from the Bureau, upon request.

HERBERT MARSHALL,  
*Dominion Statistician,*

## PRÉFACE

Le présent rapport est publié en vertu d'une entente établissant la collaboration en matière de statistique entre le Bureau fédéral de la statistique et les différents services administratifs ayant juridiction sur les pêcheries canadiennes. Ces services comprennent le ministère fédéral des Pêcheries, qui a charge des pêcheries des provinces maritimes, du Yukon et des territoires du Nord-Ouest, et de la Colombie-Britannique, et les Divisions des pêcheries des provinces d'Ontario, Québec, Manitoba, Saskatchewan et Alberta, qui régissent la pêche dans leur province respective.

En vertu de l'entente, les statistiques des prises de poisson et des produits vendus à l'état frais ou après une préparation sommaire sont recueillies par les fonctionnaires locaux du ministère des Pêcheries, vérifiées au ministère, et réunies au Bureau fédéral de la statistique. Quant au poisson industriellement préparé et ses sous-produits, des formules semblables à celles qui sont en usage pour d'autres parties du recensement des industries sont envoyées directement par le Bureau aux usines poissonnières, les fonctionnaires des services de la pêche veillant à ce qu'elles soient consciencieusement remplies et promptement renvoyées. Nous prions les fonctionnaires des gouvernements provinciaux de bien vouloir accepter nos remerciements pour le concours qu'ils nous ont prêté.

Les statistiques du commerce extérieur des produits de la pêche se limitent à trois tableaux sommaires, car des tableaux détaillés montrant les produits par pays importateur et exportateur sont présentés dans les publications de la Division du commerce extérieur du Bureau fédéral de la statistique.

Les statistiques de la Saskatchewan représentent la quantité vendue, soit comme poisson entier ou comme poisson habillé. Comme aucune distinction n'a été établie entre ces deux formes, le poids des débarquements est diminué par la quantité perdue à l'habillage.

Les chiffres détaillés, par comté et par région, sont omis des tableaux provinciaux du présent volume, mais ils peuvent être obtenus du Bureau sur demande.

HERBERT MARSHALL,  
*Statisticien du Dominion.*

## TABLE FOR CONVERSION OF WEIGHTS OF FISH

Fresh fish in this table in the case of cod, haddock, hake, cusk and pollock, means fish with the head on and the entrails removed. The weight of halibut is to be the weight minus head and entrails. In case of swordfish and tuna, it means fish with the head, tail and entrails removed. In all other cases, fresh fish means fish as it comes from the water.

### COD, HADDOCK, HAKE, CUSK OR POLLOCK

- 300 lb. of fresh produce one cwt. of fresh fillets.
- 105 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one cwt. of green salted.
- 300 lb. of fresh produce one cwt. of smoked fillets.
- 200 lb. of fresh produce one cwt. of smoked.
- 300 lb. of fresh produce one cwt. (100 lb.) of dried.
- 400 lb. of fresh produce one cwt. of boneless.

### HERRING

- 70 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one cwt. of smoked.
- 300 lb. of fresh produce one barrel of pickled.
- 200 lb. of fresh produce one barrel of bait (fresh or salted).
- 200 lb. of fresh produce one barrel of fertilizer.
- 115 lb. of fresh produce one cwt. of dry salted.

### MACKEREL OR SHAD

- 70 lb. of fresh produce one case of canned.
- 300 lb. of fresh produce one barrel of pickled.
- 400 lb. of fresh produce one barrel of salt mackerel fillets.

### SARDINES

- One barrel of fresh produces 4 to 5 cases canned.
- (One case of 25 lb. equals 100 tins of  $\frac{1}{4}$  lb. each.)

### PILCHARDS

- 70 lb. of fresh produce one case of canned.
- 200 lb. of fresh produce one barrel of bait.

### ALEWIVES

- 200 lb. of fresh produce one cwt. of smoked.
- 275 lb. of fresh produce one barrel of pickled.

### SALMON

- 75 lb. of fresh (Pacific) produce one 48-lb. case canned.
- 70 lb. of fresh (Atlantic) produce one 48-lb. case canned.
- 70 lb. of fresh produce one cwt. of smoked.
- 25 lb. of fresh produce one cwt. of dry salted.
- 50 lb. of fresh produce one cwt. of mild cured.
- 50 lb. of fresh produce one cwt. of pickled.

### TUNA

- 100 lb. of fresh produce one case canned.

## TABLEAU DE CONVERSION DE LA PESÉE DU POISSON

Dans ce tableau, dans le cas de la morue, de l'églefin, de la merluche, du brosmius, et du merlan, on entend par poisson frais le poisson dont on a enlevé les entrailles et non la tête. Le poids du flétan est pris après l'enlèvement de la tête et des entrailles. Dans le cas de l'espadon et du chon le poids comprend le poisson après l'enlèvement de la tête, de la queue et des entrailles. Pour tous les autres poissons le terme "poisson frais" signifie le poisson tel qu'il est sorti de l'eau.

### MORUE, ÉGLEFIN, MERLUCHE, BROSMIUS OU MERLAN

- 300 liv. de poisson frais donnent 1 cwt de filets frais.
- 105 liv. de poisson frais donnent une caisse de poisson en boîte.
- 200 liv. de poisson frais donnent 1 cwt de poisson salé vert.
- 300 liv. de poisson frais donnent 1 cwt de filets fumés.
- 200 liv. de poisson frais donnent 1 cwt de poisson fumé.
- 300 liv. de poisson frais donnent 1 cwt de poisson séché. (100 liv.)
- 400 liv. de poisson frais donnent 1 cwt de poisson désossé.

### HARENG

- 70 liv. de poisson frais donnent une caisse de hareng en boîte.
- 200 liv. de poisson frais donnent 1 cwt de hareng fumé.
- 300 liv. de poisson frais donnent un baril de hareng saumuré.
- 200 liv. de poisson frais donnent un baril de boëtte (fralche ou salée).
- 200 liv. de poisson frais donnent un baril d'engrais.
- 115 liv. de poisson frais donnent 1 cwt de hareng salé à sec.

### MAQUEREAU OU ALOSE

- 70 liv. de poisson frais donnent une caisse de poisson en boîte.
- 300 liv. de poisson frais donnent un baril de poisson saumuré.
- 400 liv. de poisson frais donnent un baril de filets de maquereau salés.

### SARDINE

- Un baril de poisson frais donne de 4 à 5 caisses de poisson en boîte.
- (Une caisse de 25 livres équivaut à 100 boîtes de  $\frac{1}{4}$  de liv. chacune.)

### PILCHARD

- 70 liv. de poisson frais donnent une caisse de poisson en boîte.
- 200 liv. de poisson frais donnent un baril de boëtte.

### GASPAROT

- 200 liv. de poisson frais donnent 1 cwt de poisson fumé.
- 275 liv. de poisson frais donnent un baril de poisson saumuré.

### SAUMON

- 75 liv. de poisson frais (Pacifique) donnent une caisse de 48 liv. de poisson en boîte.
- 70 liv. de poisson frais (Atlantique) donnent une caisse de 48 liv. de poisson en boîte.
- 170 liv. de poisson frais donnent 1 cwt de poisson fumé.
- 125 liv. de poisson frais donnent 1 cwt de poisson salé à sec.
- 150 liv. de poisson frais donnent 1 cwt de poisson fumé doux.
- 150 liv. de poisson frais donnent 1 cwt de poisson saumuré.

### THON

- 100 liv. de poisson frais donnent une caisse de poisson en boîte.

### CLAMS

*Atlantic Coast*—200 lb. of fresh produce one case of canned (48 tins of 5 oz. of clam meat each).

*Pacific Coast:*

Razor clams—80 lb. of fresh produce one case of canned (48 tins of 6 oz. of clam meat each).

Little neck, butter clams, etc.—150 lb. of fresh produce one case of canned (48 tins of 6 oz. of clam meat each).

### CRABS

*Pacific Coast*—100 lb. of fresh (approximately 6 dozen) produce one case of canned (48 tins of 6½ oz. each of drained crab meat).

### LOBSTERS

200 lb. of fresh produce one case of canned (48 tins of 12 oz. of lobster meat each).

500 lb. of fresh produce one cwt. of lobster meat.

### COQUES

*Littoral de l'Atlantique*—200 liv. de coques fraîches donnent une caisse de coques en boîtes (48 boîtes de 5 onces de chair chacune).

*Littoral du Pacifique:*

Couteaux—80 liv. de chair fraîche donnent une caisse de chair en boîte (48 boîtes de 6 onces de chair chacune).

Praire du Pacifique, amandes de mer, etc.—150 liv. de chair fraîche donnent une caisse de chair en boîte. (48 boîtes de 6 onces de chair chacune).

### CRABES

*Littoral du Pacifique*—100 liv. de crabe frais (environ 6 douzaines) donnent une caisse de chair en boîte (48 boîtes de 6½ onces de chair égouttée chacune).

### HOMARD

200 liv. de homard frais donnent une caisse de homard en boîte (48 boîtes de 12 onces de chair chacune).

500 liv. de homard frais donnent 1 cwt de chair.

# FISHERIES STATISTICS OF CANADA

## STATISTIQUE DES PÊCHERIES DU CANADA

The total value of the production of the fisheries of Canada for the year 1948 was \$139,826,200, an increase of 12.9 p.c. over the 1947 figure of \$123,900,200. These totals represent the value of the product as marketed, whether sold for consumption fresh, domestically prepared or factory made. The quantity landed increased by 17.5 p.c. from 1,220,840,000 pounds in 1947 to 1,434,534,000 pounds in 1948. Table 1 shows the quantity landed and the value marketed of the chief commercial fishes for the past three years, with a statement in the final column of the increase or decrease for 1948 compared with 1947, while Table 2 gives the quantity and value of all fish as landed and marketed, for the years 1946-48.

La valeur globale des produits de la pêche au Canada en 1948 est de \$139,826,200, soit une augmentation de 12.9 p.c. sur le montant de \$123,900,200 en 1947. Ces totaux représentent la valeur du produit vendu, soit pour la consommation à l'état frais, de préparation domestique, ou conditionné à la fabrique. La quantité débarquée augmente de 17.5 p.c., ou de 1,220,840,000 livres en 1947 à 1,434,534,000 livres en 1948. Le tableau 1 donne la quantité débarquée et la valeur sur le marché des principales espèces commerciales de poisson pour les trois dernières années, avec indication dans la dernière colonne de l'augmentation ou de la diminution en 1948, comparativement à 1947, tandis que le tableau 2 donne la quantité et la valeur de tout le poisson débarqué et vendu au cours des années 1946 à 1948.

The following statement prepared from Canadian Fisheries Statistics for the year shows the catches by Canadian fishermen in 1947 and 1948 in certain areas, defined by the North American Council on Fishery Investigations, an international body representative of Canada, U.S.A., Newfoundland and France for the co-ordination of fishery investigations in the Atlantic waters of the Continent. The boundaries of the areas are indicated in the accompanying chart.

L'état suivant, préparé d'après la Statistique de la pêche au Canada, porte sur les prises des pêcheurs canadiens dans certaines zones en 1947 et 1948. Ces zones ont été établies par le Conseil nord-américain des recherches sur les pêcheries, organisme international représentant le Canada, les États-Unis, Terre-Neuve et la France, qui a pour fonction de coordonner les enquêtes relatives à la pêche dans les eaux de l'Atlantique attenante au continent. Les limites des différentes zones sont indiquées sur la carte ci-attachée.

## CAPITAL EQUIPMENT AND EMPLOYEES

## In Primary Operations

**Capital.** — The capital investment, represented by the vessels, boats, nets, traps, piers and wharves, etc. used in the primary operations of catching and landing the fish, had a total value in 1948 of \$67,289,300, of which \$57,459,200, or 85.4 p.c., is credited to the sea fisheries, and \$9,830,100, or 14.6 p.c., to the inland fisheries. The total amount shows an increase of \$8,700,300 when compared with the year 1947.

## OUTILLAGE ET EMPLOYÉS

## Dans les opérations primaires

**Capital.** — Les immobilisations globales en fait de vaisseaux, barques, filets, pièges, quais et mûles, etc., employés dans les opérations primaires de la prise et du débarquement du poisson en 1948, sont de \$67,289,300, dont \$57,459,200, ou 85.4 p.c., pour la pêche maritime, et \$9,830,100, ou 14.6 p.c., pour la pêche intérieure. Le montant global indique une augmentation de \$8,700,300 sur 1947.

**Employees.** — The number of men engaged in fishing during the year was 66,115, comprising 47,366 employed in the sea fisheries and 18,749 in the inland fisheries. There was an increase of 696 persons over the previous year, sea fisheries showing a gain of 117, and inland fisheries one of 579.

#### In Fish Processing

**Capital.** — In line with the practice adopted throughout the Census of Industry, figures of present capital value are no longer collected.

**Employees.** — The employees engaged in the fish processing plants in 1948 numbered 16,497, including 10,329 male and 6,168 female employees. This shows a slight increase of 39 when compared with 16,458 in 1947 (10,501 male, and 5,957 female).

Tables 8 to 10, which follow, contain summaries for Canada, and the same information by provinces is contained in their respective sections

**Employés.** — Le nombre d'hommes employés à la pêche durant l'année s'élève à 66,115, dont 47,366 dans les pêcheries maritimes et 18,749 dans les pêcheries intérieures. Comparativement à l'année précédente, ce total représente une augmentation de 696: un gain de 117 dans la pêche maritime, et de 579 dans celle de l'intérieur.

#### Dans le conditionnement

**Capital.** — Conformément à la pratique adoptée au recensement de l'industrie, les chiffres sur la valeur des immobilisations ne sont plus recueillis.

**Employés.** — Les employés de ces établissements sont au nombre de 16,497, dont 10,329 hommes et 6,168 femmes. Soit une augmentation de 39 par rapport à 16,458 employés en 1947.

Les tableaux 8 à 10, qui suivent, donnent les résumés pour le Canada, tandis que les mêmes renseignements, par province, sont présentés dans leurs sections respectives.

## FOREIGN TRADE

**Exports.** — The total value of the domestic exports of fish and fishery products, in 1948, was \$89,697,000, an increase of seven per cent over the \$83,811,200 recorded for 1947.

The five leading items were, in order of their value, fresh lobsters (\$9,182,000), canned salmon (\$8,933,200), fresh and frozen salmon, not filleted (\$6,462,200), canned sea herring (\$6,413,700), and dried cod (\$5,345,400). These most important products accounted for 10.2 p.c., 10.0 p.c., 7.2 p.c., 7.2 p.c., and 6.0 p.c., respectively, of the total value of exports in 1948.

All of the fresh lobsters, and almost all of the fresh and frozen salmon went to the United States. Most of the canned salmon was consigned to Belgium, the United Kingdom and the Union of South Africa. The principal markets for canned sea herring were Greece, Italy, Austria and the Philippine Islands; an interesting fact to note is that none of it went to the Soviet Union, which, in 1947, had purchased \$2,663,500 of canned sea herring from Canada. A good proportion of the dried cod was sent to Cuba and the United States.

Of the total value of the fisheries exports in 1948, the United States received 68.8 p.c., while the British Countries received 11.4 p.c.; only 2.0 p.c. went to the United Kingdom.

**Imports.** — The imports, in 1948, totalled \$11,600,600, as compared with \$12,952,300 in 1947. Whale oil, valued at \$4,763,100, was by far the most important single item; almost all of it came from the United Kingdom and Newfoundland. Notable values of fresh cod, haddock and pollock, and of canned sardines, anchovies and sprats were also imported.

Detailed statistics concerning exports and imports are given in Tables 13, 14 and 15.

## COMMERCE EXTÉRIEUR

**Exportations.** — La valeur globale des exportations domestiques de poisson et de produits de la pêche est de \$89,697,000 en 1948, augmentation de sept pourcent sur le montant de \$83,811,200 en 1947.

Les cinq principaux produits sont, par ordre de valeur, le homard frais (\$9,182,000), le saumon en boîte (\$8,933,200), le saumon frais et gelé, non en filets (\$6,462,200), le hareng de mer en boîte (\$6,413,700), et la morue séchée (\$5,345,400). Ces variétés principales représentent respectivement 10.2 p.c., 10.0 p.c., 7.2 p.c., 7.2 p.c., et 6.0 p.c. de la valeur globale en 1948.

Tout le homard frais, et presque tout le saumon frais et gelé vont aux États-Unis. Une grande partie du saumon en boîte est consignée à la Belgique, au Royaume-Uni et à l'Union sud-africaine. Les principaux marchés pour le hareng de mer en boîte sont la Grèce, l'Italie, l'Autriche et les Îles Philippines, il est intéressant de noter que l'Union soviétique, qui, en 1947, avait acheté ce produit pour une valeur de \$2,663,500, n'en acheta pas du tout en 1948. Une bonne proportion de la morue séchée est envoyée au Cuba et aux États-Unis.

Les États-Unis reçoivent 68.8 p.c. de la valeur globale des exportations de poisson, en 1948, tandis que les pays britanniques en reçoivent 11.4 p.c.; seulement 2.0 p.c. va au Royaume-Uni.

**Importations.** — Les importations atteignent \$11,600,600 en 1948, au regard de \$12,952,300 en 1947. L'huile de baleine est de beaucoup le produit le plus important, provenant presque entièrement du Royaume-Uni et de Terre-Neuve. On note aussi des valeurs appréciables de morue, d'églefin et de merluche à l'état frais, et de sardines et anchois en boîte.

Des statistiques détaillées sur les exportations et les importations paraissent dans les tableaux 13, 14 et 15.

## FISHERIES BOUNTY

Under authority of "An Act to Encourage the Development of the Sea Fisheries and the Building of Fishing Vessels", the sum of \$160,000 is appropriated annually by the Governor in Council. It is distributed under the name of Fishing Bounty by the Department of Fisheries amongst fishermen and fishing vessel and boat owners on the Atlantic coast, under regulations made from time to time by the Governor in Council.

## A. The basis of distribution for 1947 was as follows:

1. To owners of vessels entitled to receive bounty, \$1 per registered ton, payment to the owner of any one vessel not to exceed \$80.
2. To vessel fishermen entitled to receive bounty, \$8.45 each.
3. To owners of boats measuring not less than twelve foot keel, \$1 per boat.
4. To boat fishermen entitled to receive bounty, \$7.95 each.

Payments for the season of 1947 amounted  
in all to: ..... \$159,992.75

Allotted as follows:

To 973 vessels and  
their crews ..... \$ 48,090.45  
To 7,904 boats and  
their crews ..... \$111,902.30     \$159,992.75

## B. The basis of distribution for 1948 was as follows:

1. To owners of vessels entitled to receive bounty, \$1 per registered ton, payment to the owner of any one vessel not to exceed \$80.
2. To vessel fishermen entitled to receive bounty, \$8.30 each.
3. To owners of boats measuring not less than twelve foot keel, \$1 per boat.
4. To boat fishermen entitled to receive bounty, \$8.30 each.

Payments for the season 1948 amounted  
in all to: ..... \$158,177.55

Allotted as follows:

To 976 vessels and  
their crews ..... \$ 46,741.30  
To 7,661 boats and  
their crews ..... \$111,436.25     \$158,177.55

## PRIMES DE PÊCHE

En vertu d'une "Loi pour encourager le développement des pêcheries maritimes et la construction des navires de pêche", une somme de \$160,000 est donnée en primes chaque année par le gouverneur en conseil. Sous le nom de primes de pêche, elles sont distribuées par le ministère des pêcheries aux pêcheurs et aux propriétaires de navires et de barques de pêche du littoral de l'Atlantique selon les règlements édictés de temps à autre par le gouverneur en conseil.

## A. En 1947, la base de distribution fut la suivante:

1. Aux propriétaires de navires de pêche ayant droit à cette prime, \$1 par tonne enregistrée, avec un maximum de \$80 par navire.
2. A chaque membre de l'équipage ayant droit à la prime, \$8.45.
3. Aux propriétaires de barques mesurant au moins douze pieds de quille, \$1 par embarcation.
4. A chaque pêcheur d'une barque ayant droit à une prime, \$7.95.

Le montant payé en 1947  
fut le suivant: ..... \$159,992.75

Réparti comme suit:

A 973 propriétaires de navire et  
leurs équipages ..... \$ 48,090.45  
A 7,904 propriétaires de  
barques et leurs équipages \$111,902.30     \$159,992.75

## B. En 1948, la base de distribution fut la suivante:

1. Aux propriétaires de navires de pêche ayant droit à cette prime, \$1 par tonne enregistrée, avec un maximum de \$80 par navire.
2. A chaque membre de l'équipage ayant droit à cette prime, \$8.30.
3. Aux propriétaires de barques mesurant au moins douze pieds de quille, \$1 par embarcation.
4. A chaque pêcheur d'une barque ayant droit à une prime, \$8.30.

Le montant payé en 1948  
fut le suivant: ..... \$158,177.55

Réparti comme suit:

A 976 propriétaires de navire et  
leurs équipages ..... \$ 46,741.30  
A 7,661 propriétaires de  
barques et leurs équipages \$111,436.25     \$158,177.55

Note: A number of late claims amounting in all to \$1,787.65 which are included in this statement are for the season 1946. As the basis of distribution for 1947 differed from that of 1946, a number of figures in the "Amount" column do not, as a result, balance with a number of claims paid. Les réclamations tardives s'élevant à \$1,787.65 et se rapportant à 1946 sont comprises dans le présent tableau. Comme la base de distribution pour 1947 diffère de celle de 1946, plusieurs chiffres de la colonne "Montant" ne concordent pas avec le nombre de réclamations payées.

TABLEAU 82. Résumé statistique des établissements de conditionnement du poisson, Colombie-Britannique, 1947 et 1948 — fin

Fish curing establishments Saurisseries	Fresh fish and freezing plants Établissements de poisson frais et de congélation	Reduction plants Huilleries	Unit of measure Unité de mesure		No
1948					
—	1	13	nomb.	Outillage moteur installé (ordinairement en usage)	1
—	9	674	H.P.	Machines et turbines à vapeur.....	2
—	2	16	nomb.	Moteurs diésels .....	3
—	260	1,488	H.P.	.....	4
—	—	7	nomb.	Moteurs à gazoline, à gaz et à l'huile .....	5
—	—	408	H.P.	.....	6
—	—	8	nomb.	Turbines ou roues hydrauliques .....	7
—	—	600	H.P.	.....	8
—	3	44	nomb.	Total, moteur primaire .....	9
—	269	3,170	H.P.	.....	10
41	97	112	nomb.	Moteurs électriques mus par courant acheté .....	11
382	2,011	652	H.P.	.....	12
41	100	156	nomb.	Total, outillage moteur .....	13
382	2,280	3,822	H.P.	.....	14
—	—	16	nomb.	Moteurs électriques mus par les sources d'énergie de moteur primaire ....	15
—	—	79	H.P.	.....	16
41	97	128	nomb.	Total, moteurs électriques .....	17
382	2,011	731	H.P.	.....	18
—	1	14	nomb.	Chaudières .....	19
—	60	1,633	H.P.	.....	20
—	3	1	nomb.	Groupes de moteurs-générateurs .....	21
—	184	12	H.P.	.....	22
